**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

## Introduction

It is my great pleasure to present the proceedings of the International Symposium on Photonics and Optoelectronics (SOPO), held in Suzhou, China, from August 22nd to 24th, 2014. I would like to take this opportunity to thank all the authors and participants for their support of our conference.

With the development of technology, a great variety of research results are emerging. Following the rapid development trend, SOPO 2014 serves as a forum for the academic professionals and researchers to exchange the most updated information and achievements in exciting research areas.

On behalf of the organizing committee, I would like to express our gratitude to our sponsors: Wuhan University, Ningbo University and Tianjin University. At the same time, we appreciate the contributions from our paper reviewers and the committee members. Your efforts make the conference a success.

The proceedings provide a concise but timely medium for the dissemination of recent research results. I hope that you find the proceedings interesting, exciting and informative.

Thanks again for your attention and support of our conference.
