**Volume 11559**

Proceedings of SPIE 0277-786X, V. 11559

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Infrared, Millimeter-Wave, and Terahertz Technologies VII, edited by Cunlin Zhang, Xi-Cheng Zhang, Masahiko Tani, Proc. of SPIE Vol. 11559, 1155901 · © 2020 SPIE  
CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2586001

Proc. of SPIE Vol. 11559 1155901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared, Millimeter-Wave, and Terahertz Technologies VII*, edited by Cunlin Zhang, Xi-Cheng Zhang, Masahiko Tani, Proceedings of SPIE Vol. 11559 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

**SESSION 1 NOVEL THz GENERATION AND DETECTION**

---

11559 07 **Efficient tunable terahertz generation via noncollinear phase matching in ZnGeP<sub>2</sub> crystal**  
[11559-6]

---

**SESSION 2 SPECTROSCOPY AND IMAGING**

---

11559 08 **Optically driven terahertz wave polarization control by unaligned carbon nanotubes (Invited Paper)** [11559-7]

11559 0A **Interpretation of THz intensities of molecular crystals: the role of mixing between intermolecular and intramolecular vibrations (Invited Paper)** [11559-9]

11559 0B **Zero biased W band detector based on InGaAs Schottky diode** [11559-10]

11559 0C **Application of terahertz technology in the identification of traditional Chinese medicine**  
[11559-12]

---

**SESSION 3 TESTING AND CALIBRATION**

---

11559 0E **Infrared detectors based on laser-reduced graphene oxide /PEDOT:PSS/perovskite hybrid (Invited Paper)** [11559-15]

11559 0F **Large-dynamic-range RCS measurements at high terahertz frequency range** [11559-16]

11559 0H **Thermal property analysis characterization of the bronze casting moulds** [11559-18]

11559 0I **High-precision thermography based on JMAP inference for human face temperature**  
[11559-19]

11559 0J **Tunable 2 $\mu$ m dual-wavelength PPLN optical parametric oscillator intracavity pumped by passive Q-switched Nd:YLF lasers** [11559-20]

---

**POSTER SESSION**

---

11559 0K **Hybrid tunable chiral metasurfaces for amplitude and wavefront control of circularly polarized terahertz wave** [11559-13]

- 11559 OL **Methodology on precision imaging optimized in-vivo system** [11559-21]
- 11559 OM **External field calibration method for low-temperature section of infrared radiation measuring equipment** [11559-22]
- 11559 ON **THz research on high-frequency waves under different ionization modes** [11559-23]
- 11559 OO **Simulation of THz-TDS echo filtering algorithm based on deep learning** [11559-24]
- 11559 OP **A novel terahertz modulator based on nested square rings and vanadium oxide phase-change materials** [11559-25]
- 11559 OQ **Characterizations of montmorillonite using terahertz time-domain spectroscopy** [11559-26]
- 11559 OT **Ultra-broadband long-wavelength infrared metamaterial absorber based on hybrid structure of holes and pillars** [11559-29]
- 11559 OW **Method for identifying different Chinese-medicine-based sources based on terahertz time-domain spectroscopy technology** [11559-32]
- 11559 OX **High-resolution terahertz Doppler velocimetry based on frequency difference multiplication** [11559-33]
- 11559 OY **Rapid prediction of potato leaf moisture content** [11559-34]
- 11559 OZ **Analysis of response of THz spectroscopy to insect foreign bodies hidden in tea products** [11559-35]
- 11559 10 **The optical system design of broadband infrared imaging spectrometer** [11559-36]
- 11559 12 **Scene-based non-uniformity correction for high-throughput LWIR imaging spectrometer using optical defocus method** [11559-38]
- 11559 15 **Terahertz absorption characteristics of solutions at different pH values** [11559-41]
- 11559 16 **Properties of split ring resonators metamaterials terahertz sensor on flexible substrates** [11559-42]
- 11559 18 **Study of thin bismuth-based films using terahertz time-domain polarimetry** [11559-44]
- 11559 19 **Diagnosis of blast-induced traumatic brain injury in rat based on terahertz spectroscopy of serum** [11559-45]
- 11559 1A **Propagation characteristics of terahertz wave in inhomogeneous dusty plasma sheath considering scattering process** [11559-46]
- 11559 1B **An interference elimination method for CW-THz reflection imaging** [11559-47]

- 11559 1C **Recovering THz signal from water vapor degradation based on support-vector-machine algorithm** [11559-48]
- 11559 1E **Generation of polarization controllable strong THz source from air plasma excited by three-color laser field** [11559-50]
- 11559 1F **Observation of tunable resonance mode by changing the conductivity in terahertz metamaterial** [11559-51]
- 11559 1G **Study on terahertz transmission spectrum of single and double split ring resonators integrated with MoS<sub>2</sub>** [11559-52]
- 11559 1H **Varied terahertz transmission responses observed from split ring resonator based on polyethylene terephthalate** [11559-53]
