Volume 11874

Proceedings of SPIE 0277-786X, V. 11874

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Illumination Optics VI, edited by Tina E. Kidger, Stuart David, Proc. of SPIE Vol. 11874,
1187401 · © 2021 SPIE · CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2615025

Proc. of SPIE Vol. 11874 1187401-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Illumination Optics VI*, edited by Tina E. Kidger, Stuart David, Proc. of SPIE 11874, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

TRENDS IN AUTOMOTIVE LIGHTING

- 11874 04 **Optimizing efficiency and appearance of the light distribution in automotive light guide luminaires (Invited Paper)** [11874-1]
- 11874 05 **Automotive headlamp optics for a pixelated μ LED source** [11874-2]
- 11874 06 **Evaluation of luminance vs. brightness for automotive RGB LED light guides in autonomous cars** [11874-3]
- 11874 08 **Light scattering in automotive paints: continuous medium approach vs correlations between particles** [11874-5]
- 11874 09 **The design of illumination optics for vehicle communication issues** [11874-6]

MODELLING EFFECTS AND TECHNIQUES IN OPTICAL SYSTEMS

- 11874 0A **Modeling interference using Monte Carlo ray trace (Invited Paper)** [11874-7]
- 11874 0B **Modeling real life LED spectra from data sheet information only** [11874-8]
- 11874 0C **Optical design of a variable beam angle fiber light source** [11874-9]
- 11874 0E **Advanced high-power laser diode combination design for laser scanning applications** [11874-12]
- 11874 0F **Optimal number of rays in bi-directional stochastic ray tracing with photon maps** [11874-15]

ILLUMINATION APPLICATIONS

- 11874 0H **Efficient illumination design method for exterior automotive lighting applications (Invited Paper)** [11874-17]
- 11874 0I **Simulation of fingerprinting based Visible Light Positioning without the need of prior map generation** [11874-18]
- 11874 0J **New approaches to improve the illumination optics of rigid endoscopes** [11874-19]
- 11874 0K **Optimal optical design of aspheric ultrasonic probe for photoacoustic microscopy** [11874-20]

- 11874 OL **Determination of tumor characteristics using light transport based on Monte Carlo simulation**
[11874-21]
- 11874 OM **Surgical lamp for contrast imaging of biological tissues** [11874-22]
- 11874 ON **Extended depth of field photoacoustic microscopy using image fusion based on deep learning**
[11874-24]

FREEFORM TECHNIQUES

- 11874 OO **Optimizing freeform lenses for non-rectangular irradiance tailoring of extended LED sources**
(Invited Paper) [11874-25]
- 11874 OQ **Simulation and design of a Fresnelized freeform optic for a head-up display** [11874-27]
- 11874 OR **Design of microlens arrays with aspheric surfaces for uniform illumination** [11874-28]
