**Volume 12031**

Part One of Two Parts

Proceedings of SPIE, 1605-7422, V. 12031

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Imaging 2022: Physics of Medical Imaging, edited by Wei Zhao, Lifeng Yu, Proc. of SPIE  
Vol. 12031, 1203101 · © 2022 SPIE · 1605-7422 · doi: 10.1117/12.2638183

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xv *Conference Committee*

## Part One

---

### X-RAY AND PHASE CONTRAST IMAGING

---

- 12031 02 **Test and optimization of a multi-modal phase-based x-ray microscope for soft tissue imaging** [12031-17]
- 12031 03 **A feasibility study of dual-energy digital breast tomosynthesis for three-compartment-breast imaging** [12031-18]
- 12031 04 **Mathematical foundations of a novel reconstruction algorithm that facilitates real-time 4D tomosynthesis** [12031-19]
- 12031 05 **Impact of a high aspect ratio antiscatter grid for coronary angiography imaging on imaging system dose efficiency** [12031-23]
- 12031 06 **Single-shot quantitative x-ray imaging using a primary modulator and dual-layer detector: simulation and phantom studies** [12031-24]
- 12031 07 **2D vessel contrast dilution gradient (CDG) analysis using 1000 fps high speed angiography (HSA) for velocity distribution estimation** [12031-78]

---

### BREAST IMAGING

---

- 12031 08 **Deep convolutional neural network regularized digital breast tomosynthesis reconstruction with detector blur and correlated noise modeling** [12031-1]
- 12031 09 **Virtual clinical trial of simultaneous digital breast tomosynthesis and mechanical imaging: model calibration and the effect of tumor depth** [12031-2]
- 12031 0A **Evaluation of a direct-indirect dual layer detector for contrast enhanced breast imaging: Monte Carlo simulations and physical experiments** [12031-4]
- 12031 0B **Theoretical comparison and optimization of CdTe and GaAs photon-counting detectors for contrast-enhanced spectral mammography** [12031-5]
- 12031 0C **Deep learning scatter estimation for breast tomosynthesis based on a realistic compressed breast shape model in the CC view** [12031-16]

---

## PHOTON-COUNTING DETECTOR AND SYSTEM

---

- 12031 OD **Measurements on a novel 4-side buttable photon counting ASIC with integrating charge sharing correction** [12031-25]
- 12031 OE **Empirical optimization of energy bin weights for compressing measurements with photon counting x-ray detectors** [12031-28]
- 12031 OF **Fast kV switching for improved material decomposition with photon counting x-ray detectors** [12031-30]
- 12031 OG **A dagger (†) photon counting detector system for both 2D and 3D interventional imaging** [12031-13]

---

## DETECTORS

---

- 12031 OH **Tellurium doped  $\alpha$ -Se devices for improved optical absorption in indirect x-ray photodetection** [12031-6]
- 12031 OI **X-ray photon-counting using silicon photomultiplier-based scintillation detectors at high x-ray tube currents** [12031-7]
- 12031 OJ **Organometal halide perovskite imager: a comparison 1.5 years after fabrication** [12031-8]
- 12031 OK **Quantitative imaging characteristics between a new, larger-FOV 1000 fps high-speed angiographic (HSA) photon-counting detector (Aries) with a smaller HSA detector (Actaeon)** [12031-9]
- 12031 OL **Effect of charge trapping and release on the performance of polycrystalline mercuric iodide x-ray converters incorporating Frisch grid structures for digital breast tomosynthesis** [12031-10]
- 12031 OM **Investigation of position linearity in position-sensitive microstrip amorphous selenium-based detector** [12031-11]

---

## CT NEW TECHNIQUES

---

- 12031 ON **PixelPrint: three-dimensional printing of realistic patient-specific lung phantoms for CT imaging** [12031-31]
- 12031 OO **Design of a digital, motion-free mechanism for fluence field modulation** [12031-32]
- 12031 OP **Control of variance and bias in CT image processing with variational training of deep neural networks** [12031-33]
- 12031 OQ **Implementation and initial experience with an interactive eye-tracking system for measuring radiologists' visual search in diagnostic tasks using volumetric CT images** [12031-34]

- 12031 OR **Personalized CT organ noise estimation from scout images** [12031-35]
- 12031 OS **Volumetric imaging and reconstruction with stationary head CT system using carbon nanotube x-ray source arrays** [12031-36]
- 12031 OT **Estimating the minimum SNR necessary for object detection in the projection domain** [12031-37]

---

#### **SIMULATION AND PHANTOMS**

---

- 12031 OU **Virtual versus reality: external validation of COVID-19 classifiers using XCAT phantoms for chest radiography** [12031-49]
- 12031 OV **The creation of a large set of realistic synthetic microcalcification clusters for simulation in (contrast-enhanced) mammography images** [12031-51]
- 12031 OW **Validation of a breast density quantization software with 3D printed breast phantoms** [12031-52]

---

#### **IMAGE RECONSTRUCTION AND NOISE REDUCTION**

---

- 12031 OX **Neural fields for dynamic imaging** [12031-54]
- 12031 OY **A deep learning one-step solution to material image reconstruction in photon counting spectral CT** [12031-90]
- 12031 OZ **Prior image-based medical image reconstruction using a style-based generative adversarial network** [12031-56]
- 12031 10 **Cardiac CT reconstruction for vendor-neutral virtual imaging trials** [12031-57]
- 12031 11 **A robust method of identifying the optimal cancellation parameters for dual-energy chest x-ray imaging** [12031-20]
- 12031 12 **Dual-energy image noise reduction on an interventional x-ray system** [12031-22]

---

#### **CT IMAGE QUALITY**

---

- 12031 13 **Overcoming the challenges of inaccurate CT numbers in low dose CT imaging (Robert F. Wagner All-Conference Best Student Paper Award, Physics of Medical Imaging Student Paper Award)** [12031-63]
- 12031 14 **Performance assessment framework for neural network denoising** [12031-64]

- 12031 15 **Towards enabling better evaluation of emphysema: investigation into a method to reduce the variability of lung CT attenuation values due to patient size and positioning** [12031-65]
- 12031 16 **A 25-reader performance study for hepatic metastasis detection: lessons from unsupervised learning** [12031-66]
- 12031 17 **Data-dependent nonlinearity analysis in CT denoising CNNs** [12031-67]
- 12031 18 **Efficient evaluation of low-contrast detectability of deep-CNN-based CT reconstruction using channelized Hotelling observer on the ACR accreditation phantom** [12031-68]

---

#### SPECTRAL CT

---

- 12031 19 **Dose prediction in proton cancer therapy based on density maps from dual-energy CT using joint statistical image reconstruction** [12031-38]
- 12031 1A **Improved quantification of coronary artery luminal stenosis in the presence of heavy calcifications using photon-counting detector CT** [12031-40]
- 12031 1B **Real-time spectral CT thermometry via physical density for image-guided tumor ablation** [12031-42]

---

#### MACHINE LEARNING IN IMAGING PHYSICS

---

- 12031 1C **Pixel-wise bias approximation and correction for convolutional neural network noise reduction in CT** [12031-69]
- 12031 1D **DeepRAR: a CNN-based approach for CT and CBCT ring artifact reduction** [12031-70]
- 12031 1E **Improving coronary artery imaging in single source CT with cardiac motion correction using attention and spatial transformer based neural networks** [12031-71]
- 12031 1F **Deep learning framework to synthesize high-count preclinical PET images from low-count preclinical PET images** [12031-72]
- 12031 1G **Markov random field texture generation with an internalized database using a conditional encoder-decoder structure** [12031-73]

---

#### CONE-BEAM CT

---

- 12031 1H **Targeted deformable motion compensation for vascular interventional cone-beam CT imaging** [12031-44]
- 12031 1I **Fast CBCT reconstruction using convolutional neural networks for arbitrary robotic C-arm orbits** [12031-45]

12031 1J **Feasibility of dual-energy cone-beam CT of bone marrow edema using dual-layer flat panel detectors** [12031-46]

12031 1K **Megavoltage cross-scatter rejection and correction using 2D antiscatter grids in kilovoltage CBCT imaging** [12031-48]

---

**IMAGING PHYSICS IN IMAGE-GUIDED INTERVENTIONS: JOINT SESSION WITH CONFERENCES 12031 AND 12034**

---

12031 1L **A motion compensated approach to quantitative digital subtraction angiography** [12031-74]

12031 1M **Real-time 3D reconstruction of multiple guidewires at dose values of conventional 2D fluoroscopy** [12031-75]

12031 1N **Toward perception-based anticipation of cortical breach during K-wire fixation of the pelvis** [12031-76]

12031 1O **Pre-treatment radiomics from radiotherapy dose regions predict distant brain metastases in stereotactic radiosurgery** [12031-12]

---

**PCD-CT EVALUATION AND APPLICATIONS**

---

12031 1P **Quantitative assessment of motion effects in dual-source dual-energy CT and dual-source photon-counting detector CT** [12031-58]

12031 1Q **Development and clinical applications of a virtual imaging framework for optimizing photon-counting CT** [12031-60]

12031 1R **Quantification of coronary calcification using high-resolution photon-counting-detector CT and an image domain denoising algorithm** [12031-61]

---

**POSTERS: BREAST IMAGING**

---

12031 1S **A study on the impact of parameter settings on the biological reproducibility and sensitivity of extracted radiomic features from full field digital mammography images** [12031-77]

12031 1T **Deep learning based denoising of mammographic x-ray images: an investigation of loss functions and their detail-preserving properties** [12031-89]

12031 1U **Towards improved lesion quantification and volume estimation with contrast-enhanced digital breast tomosynthesis using convolutional neural networks: a simulation study** [12031-101]

12031 1V **Assessment of training strategies for convolutional neural network to restore low-dose digital breast tomosynthesis projections** [12031-123]

- 12031 1W **Assessment of patch-based mammogram denoising methods using virtual clinical trials and deep learning: trade-off between denoising strength and preservation of structural details** [12031-137]
- 12031 1X **Radiomics texture analysis: comparison between real and in silico images** [12031-145]
- 12031 1Y **Maximum-likelihood estimation of thickness with a linear-scatter model for mammography** [12031-155]
- 12031 1Z **Simulation of volumetric breast densities for virtual clinical trials** [12031-156]

---

**POSTERS: CONE-BEAM CT**

---

- 12031 20 **A paddle-wheel phantom for geometric calibration of cone-beam CT with offset detector** [12031-80]
- 12031 21 **Development of high-speed micro computed tomography system based on carbon nanotube emitter x-ray source** [12031-103]
- 12031 22 **CNN-based region-of-interest image reconstruction from truncated data in cone-beam CT** [12031-106]
- 12031 23 **Quantitative dual-energy CBCT imaging with deep triple-material decomposition** [12031-116]
- 12031 24 **Towards understanding the dependencies of deep learning classification of anatomical sites from CBCT x-ray projections** [12031-126]
- 12031 25 **Investigate and optimize a dual-energy cone beam CT with a CNT x-ray source with dual focal spots** [12031-135]
- 12031 26 **The effect of x-ray tube voltage modulation to quality of perfusion images in cone beam C-arm CT** [12031-140]
- 12031 27 **Prior-aided volume of interest CBCT image reconstruction for clinical interventional data** [12031-150]
- 12031 28 **CT guided material decomposition of spectral CBCT** [12031-157]
- 12031 29 **In-between projection interpolation in cone-beam CT imaging using convolutional neural networks** [12031-164]

---

**POSTERS: CT AND MULTI-ENERGY CT**

---

- 12031 2A **Data acquisition with interleaved/gapped spectral channelization for spectral imaging in photon-counting CT** [12031-27]

- 12031 2B     **Residual-based convolutional-neural-network (CNN) for low-dose CT denoising: impact of multi-slice input** [12031-81]
- 12031 2C     **Inter- and intra-scan variability for lung imaging quantifications via CT** [12031-93]
- 12031 2D     **Simulation of the combined effects of charge sharing and pulse pileup in photon-counting CT** [12031-100]
- 12031 2E     **A stationary head CT prototype with CNT x-ray source arrays** [12031-118]
- 12031 2F     **Sparse-view CT spatial resolution enhancement via a densely connected convolutional neural network with spatial guidance** [12031-124]

**Part Two**

- 12031 2G     **Development and validation of a clinical CT system simulator** [12031-132]
- 12031 2H     **Using neural network to enhance dual-energy computed tomography parametric mapping for proton therapy** [12031-154]
- 12031 2I     **Photon-counting CT versus conventional CT for COPD quantifications: intra-scanner optimization and inter-scanner assessments using virtual imaging trials** [12031-161]
- 12031 2J     **3D residual convolutional neural network for low dose CT denoising** [12031-165]
- 12031 2K     **High-resolution CT reconstruction from Zoom-In Partial Scans (ZIPS) with simultaneous estimation of inter-scan ROI motion** [12031-171]
- 12031 2L     **Pediatric CT cranial radiation dose estimation using deep learning** [12031-174]
- 12031 2M     **A beam-filter-based low-dose imaging for multi-detector-row helical CT** [12031-177]
- 12031 2N     **Streak artifacts reduction algorithm using an implicit neural representation in sparse-view CT** [12031-182]
- 12031 2O     **Deep learning enabled wide-coverage high-resolution cardiac CT** [12031-184]
- 12031 2P     **Quality or quantity: toward a unified approach for multi-organ segmentation in body CT** [12031-187]
- 12031 2Q     **Multi-material decomposition in spectral CT with angular tube voltage modulation** [12031-191]
- 12031 2R     **Multi energy computed tomography imaging optimization** [12031-192]
- 12031 2S     **Deep-learning-based denoising for photon-counting CT: image domain or projection domain?** [12031-195]
- 12031 2T     **A sequential approach using convolutional neural networks for motion artifacts reduction with a fast CT scan mode** [12031-196]

- 12031 2U **Development and validation of a generic image-based noise addition software for simulating reduced dose computed tomography images using synthetic projections [12031-198]**
- 12031 2V **Comparing two different noise magnitude estimation methods in CT using virtual imaging trials [12031-200]**
- 12031 2W **Artificial intelligence based quantification of atherosclerotic plaque and stenosis from coronary computed tomography angiography using a novel method [12031-201]**
- 12031 2X **Metal artifact reduction by direct artifact prediction using deep learning in x-ray CT [12031-203]**
- 12031 2Y **Effects of image denoising on quantitative material decomposition in photon-counting spectral computed tomography [12031-204]**
- 12031 2Z **Single-scan half-fan DECT using static detector modulation: a preliminary study [12031-205]**
- 12031 30 **Study for band artifact correction for photon counting detector CT [12031-206]**
- 12031 31 **A new method to reduce helical artifacts in the reconstructed image from direct filtered backprojection [12031-207]**
- 12031 32 **From spectral decomposition through SVD to quantitative description of monochromatic CT images: a phantom study [12031-208]**
- 12031 33 **Noise and dose reduction in CT brain perfusion acquisition by projecting time attenuation curves onto lower dimensional spaces [12031-209]**

---

**POSTERS: IMAGE RECONSTRUCTION**

- 12031 34 **A learned filtered backprojection method for use with half-time circular radon transform data [12031-83]**
- 12031 35 **Volumetric, dual-domain x-ray CT reconstruction with deep learning [12031-98]**
- 12031 36 **Deep MRI reconstruction with radial subsampling [12031-115]**
- 12031 37 **Image reconstruction from partially truncated data over limited-angular-ranges [12031-129]**
- 12031 38 **Impact of angular sampling interval on image reconstruction from limited-angular-range data [12031-138]**
- 12031 39 **A back-projection approach to coded aperture imaging for SPECT applications [12031-142]**
- 12031 3A **Feasibility of tomographic reconstruction from untracked ultrasound data using deep learning with transducer-specific geometry attention map [12031-153]**
- 12031 3B **A truth-based primal-dual learning approach to reconstruct CT images utilizing the virtual imaging trial platform [12031-162]**

- 12031 3C **Simultaneous correction of limited-angular-range and beam-hardening artifacts in dual-energy CT** [12031-167]
- 12031 3D **Sampling effects for emerging cone-beam CT systems and scan trajectories: from Tuy's condition to system design and routine image quality tests** [12031-55]

---

**POSTERS: MULTI-MODALITY AND IMAGE PROCESSING**

---

- 12031 3E **Fisher information comparison between a monolithic and a fiber-optic light guide in a modular gamma camera** [12031-79]
- 12031 3F **Regional diaphragm motion analysis via dynamic MRI** [12031-99]
- 12031 3G **Accelerating MRI with efficient generative neural network as prior** [12031-122]
- 12031 3H **Full-waveform ultrasound modeling of soft tissue-bone interactions using conforming hexahedral meshes** [12031-133]
- 12031 3I **Multimodality, multiscale imaging systems for investigating physiological random processes** [12031-144]

---

**POSTERS: PHASE CONTRAST**

---

- 12031 3J **A novel multi-layer grating structure for x-ray phase-contrast imaging** [12031-84]
- 12031 3K **Self-aligned fabrication of high-aspect ratio high-resolution x-ray gratings** [12031-110]
- 12031 3L **Observation of fringe patterns from a modulated phase grating x-ray interferometry system** [12031-134]
- 12031 3M **Improving adhesion quality of SU-8 to gold thin film for absorption grating fabrication in x-ray phase-contrast imaging** [12031-146]
- 12031 3N **Hybrid modulated-phase-grating for phase contrast x-ray for a varying fringe period clinical interferometry system** [12031-158]
- 12031 3O **Energy optimisation of propagation-based phase-contrast computed tomography: a quantitative image quality assessment** [12031-163]
- 12031 3P **Quantitative comparison of dual-energy CT and differential phase contrast CT imaging methods** [12031-169]

---

**POSTERS: SIMULATION AND PHANTOMS**

---

- 12031 3Q **Simulation of mid-thigh anatomy for virtual clinical studies** [12031-94]

- 12031 3R **Scanner-specific validation of a CT simulator using a COPD-emulated anthropomorphic phantom** [12031-112]
- 12031 3S **Novel Perlin-based phantoms using 3D models of compressed breast shapes and fractal noise** [12031-127]
- 12031 3T **Optimization of decimation protocols for advancing the validity of 3D model data** [12031-136]
- 12031 3U **SPECT simulation of a digital anthropomorphic brain phantom** [12031-148]
- 12031 3V **A novel female pelvis phantom for evaluation of imaging and dose calculation in CBCT-based cervical brachytherapy** [12031-113]

---

**POSTERS: X-RAY, FLUORO, AND TOMOSYNTHESIS**

---

- 12031 3W **Development of an ultra-low-dose fluoroscopy system with real-time frame rate modulation using a fully digital x-ray tube** [12031-21]
- 12031 3X **Patient-specific scatter-corrected digital chest tomosynthesis in human subjects** [12031-88]
- 12031 3Y **Simultaneous biplane high speed 1000 fps x-ray angiography (HSAngio)** [12031-96]
- 12031 3Z **Experimental optimization of the exposure allocation for xenon-enhanced dual-energy x-ray imaging of lung function** [12031-104]
- 12031 40 **Orthogonal tomosynthesis for whole body skeletal imaging enabled by carbon nanotube x-ray source array** [12031-114]
- 12031 41 **Optimization of imaging conditions in pediatric dynamic chest radiography: a virtual imaging trial** [12031-128]
- 12031 42 **Pre-clinical evaluation and optimization of image quality for a next generation tomosynthesis prototype** [12031-131]
- 12031 43 **Dual-layer flat panel detector with a-Se top layer for opportunistic screening of coronary artery calcium: a simulation study** [12031-143]
- 12031 44 **Basic study for detection of nodules in chest radiography using contrast enhancement and faster R-CNN** [12031-151]
- 12031 45 **Initial investigations of scatter cross-talk in simultaneous biplane high-speed 1000 frames per second neuro-angiography using Monte Carlo simulations** [12031-160]
- 12031 46 **Use of 1000fps high speed x-ray angiography (HSAngio) to quantify differences in flow diversion effects of three stents with different coverage densities in a cerebral aneurysm in vitro model** [12031-166]
- 12031 47 **Development of 120 kV CNT-based digital x-ray tube for fluoroscopy** [12031-173]

- 12031 48 **A novel robust pulsed laser driven x-ray source suitable for medical application (Cum Laude Poster Award)** [12031-176]
- 12031 49 **Development of carbon nanotubes emitter-based multi x-ray source array for digital chest tomosynthesis system** [12031-179]
- 12031 4A **Real-time detection of patient head position and cephalometric landmarks from neuro-interventional procedure images using machine learning for patient eye-lens dose prediction** [12031-180]
- 12031 4B **Achieving isotropic super-resolution with a non-isocentric acquisition geometry in a next-generation tomosynthesis system** [12031-183]
- 12031 4C **Investigation of optimal angular range and projection density for next generation tomosynthesis** [12031-186]
- 12031 4D **Development of 120 kV ceramic x-ray tube for panoramic dental imaging and its comparison with commercial glass x-ray tube** [12031-189]
- 12031 4E **Chest radiograph registration and its application based on deep learning segmentation masks** [12031-190]
- 12031 4F **Effect of self-focusing gate structure length in CNT-based E-gun for intraoperative specimen radiographic system** [12031-193]
- 12031 4G **Single-image high-dynamic-range reconstruction for intraoral dental x-ray images** [12031-194]
- 12031 4H **Compact x-ray tube based on carbon nanotube cold cathode emitter for handheld type x-ray application** [12031-197]
- 12031 4I **Design of CNT-based electron microbeam cell irradiation system for low-dose radiobiology research** [12031-199]

---

**POSTERS: DETECTORS**

- 12031 4J **Investigation of dark current mechanisms in a polyimide blocking layer utilized in an amorphous lead oxide-based x-ray detector** [12031-85]
- 12031 4K **A read-out strategy for high-resolution large-area SiPM-based modular gamma-ray cameras** [12031-95]
- 12031 4L **Improved temporal performance and optical quantum efficiency of avalanche amorphous selenium for low dose medical imaging** [12031-108]
- 12031 4M **Charge recombination and electron-hole pair creation energy in amorphous lead oxide x-ray photoconductor** [12031-117]
- 12031 4N **An analytical model of energy response function for CdTe-based photon counting detectors with inter-pixel communication for anti-coincidence corrections** [12031-125]

- 12031 4O **A low-power linear-logarithmic CMOS image sensor** [12031-139]
- 12031 4P **Simulations and analysis of fluorescence effects in semiconductor x-ray and gamma-ray detectors** [12031-141]
- 12031 4Q **Detailed Monte Carlo simulation of energy integrating and photon counting semiconductor detectors** [12031-149]
- 12031 4R **Point spread function of photon-counting detectors under pile-up conditions: a proposed framework** [12031-159]

# Conference Committee

## *Symposium Chairs*

**Metin N. Gurcan**, Wake Forest Baptist Medical Center (United States)  
**Robert M. Nishikawa**, University of Pittsburgh (United States)

## *Conference Chairs*

**Wei Zhao**, Stony Brook University (United States)  
**Lifeng Yu**, Mayo Clinic (United States)

## *Conference Co-chair*

**Rebecca Fahrig**, Siemens Healthcare GmbH (Germany)

## *Conference Program Committee*

**Shiva Abbaszadeh**, University of California, Santa Cruz (United States)  
**Adam M. Alessio**, Michigan State University (United States)  
**Hilde Bosmans**, UZ Leuven (Belgium)  
**Seungryong Cho**, KAIST (Korea, Republic of)  
**Mini Das**, University of Houston (United States)  
**Mats E. Danielsson**, KTH Royal Institute of Technology (Sweden)  
**Maria Drangova**, Robarts Research Institute (Canada)  
**Thomas G. Flohr**, Siemens Healthcare GmbH (Germany)  
**Arundhuti Ganguly**, Varex Imaging Corporation (United States)  
**Yongshuai Ge**, Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences (China)  
**Taly Gilat Schmidt**, Marquette University (United States)  
**Stephen J. Glick**, U.S. Food and Drug Administration (United States)  
and University of Massachusetts Medical School (United States)  
**Marc Kachelriess**, Deutsches Krebsforschungszentrum (Germany)  
**Karim S. Karim**, University of Waterloo (Canada)  
**Patrick J. La Riviere**, The University of Chicago (United States)  
**Ke Li**, University of Wisconsin School of Medicine and Public Health (United States)  
**Quanzheng Li**, Massachusetts General Hospital (United States)  
**Joseph Y. Lo**, Duke University (United States)  
**Peter B. Noël**, University of Pennsylvania (United States)  
**Frédéric Noo**, The University of Utah (United States)  
**Jinyi Qi**, University of California, Davis (United States)  
**John M. Sabol**, GE Healthcare (United States)  
**Ioannis Sechopoulos**, Radboud University Medical Center (Netherlands)

**Behrouz Shabestari**, National Institute of Biomedical Imaging and  
Bioengineering (United States)  
**Joseph W. Stayman**, Johns Hopkins University (United States)  
**Anders Tingberg**, Lund University (Sweden)  
**Adam S. Wang**, Stanford University School of Medicine (United States)  
**Yuxiang Xing**, Tsinghua University (China)  
**John Yorkston**, Carestream Health, Inc. (United States)
