SPIE

Volume 12523

Proceedings of SPIE 0277-786X, V. 12523

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Computational Imaging VII, edited by Jonathan C. Petruccelli, Chrysanthe Preza,
Proc. of SPIE Vol. 12523, 1252301 · © 2023 SPIE
0277-786X · doi: 10.1117/12.2690695

Proc. of SPIE Vol. 12523 1252301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Computational Imaging VII*, edited by Jonathan C. Petrucci, Chrysanthe Preza, Proc. of SPIE 12523, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 COMPUTATIONAL IMAGING WITH MULTIDIMENSIONAL DATA

12523 02 **Hyperspectral unmixing-based anomaly detection** [12523-2]

12523 03 **Space-division multiplexing for snapshot polarimetric imaging of tissue samples** [12523-3]

SESSION 2 3D IMAGING AND DESIGN

12523 04 **Design of a free-form lens for an LED illumination system using optimization of one-dimensional refracting surfaces** [12523-6]

12523 05 **All-in-focus reconstruction of a dynamic scene from multiple-multifocus captures** [12523-8]

SESSION 3 IMAGING THROUGH COMPLEX MEDIA

12523 06 **Digital adaptive optics with interferometric homodyne encoding for mitigating atmospheric turbulence for imaging applications** [12523-11]

12523 07 **A study of imaging in the existence of resonance with multiple scattering in isotropic homogeneous media** [12523-32]

SESSION 4 QUANTITATIVE PHASE IMAGING

12523 08 **Improving space bandwidth product of reflective digital holographic microscopy by the use of Fourier-ptychographic illumination technique** [12523-15]

SESSION 5 DEEP LEARNING TECHNIQUES IN COMPUTATIONAL IMAGING

12523 09 **Normalized determinant pooling layer in CNNs for multi-label classification** [12523-17]

12523 0A **Structured illumination microscope image reconstruction using unrolled physics-informed generative adversarial network (UPIGAN)** [12523-18]

SESSION 6 COMPUTATIONAL X-RAY IMAGING

12523 0B **Dark field signal maximization in mesh-based x-ray imaging** [12523-22]

12523 0C **Initial investigation of mesh-based x-ray phase tomography** [12523-23]

SESSION 7 IMAGE ENHANCEMENT WITH COMPUTATIONAL IMAGING

12523 0D **Non-blind hardware and software deconvolution for jitter reduction** [12523-24]

POSTER SESSION

12523 0E **Deep learning photo-acoustic microscopy with three-dimensional under sampled data reconstruction** [12523-28]

DIGITAL POSTER SESSION

12523 0F **Sampling templates guided compression reconstruction network** [12523-19]

12523 0G **Super-resolution-imaging based on circular coded aperture** [12523-25]

12523 0H **Super-resolution-imaging by synthetic aperture with incoherent illumination** [12523-26]

Conference Committee

Symposium Chairs

Tien Pham, The MITRE Corporation (United States)
Douglas R. Droege, L3Harris Technologies, Inc. (United States)

Symposium Co-chairs

Augustus W. Fountain III, University of South Carolina (United States)
Teresa L. Pace, L3Harris Technologies, Inc. (United States)

Program Track Chair

David W. Messinger, Rochester Institute of Technology (United States)

Conference Chairs

Jonathan C. Petrucci, University at Albany (United States)
Chrysanthe Preza, The University of Memphis (United States)

Conference Program Committee

Nicholas Antipa, University of California, San Diego (United States)
Amit Ashok, Wyant College of Optical Sciences (United States)
Shwetadwip Chowdhury, The University of Texas at Austin
(United States)
Oliver Cossairt, Northwestern University (United States)
Michael E. Gehm, Duke University (United States)
Ryoichi Horisaki, Osaka University (Japan)
Ulugbek Kamilov, Washington University in St. Louis (United States)
Jun Ke, Beijing Institute of Technology (China)
Jinyang Liang, Institut National de la Recherche Scientifique (Canada)
George Nehmetallah, The Catholic University of America
(United States)
Yaron Rachlin, MIT Lincoln Laboratory (United States)
Adrian Stern, Ben-Gurion University of the Negev (Israel)
Lei Tian, Boston University (United States)
Andreas Velten, University of Wisconsin-Madison (United States)
Laura Waller, University of California, Berkeley (United States)
Ge Wang, Rensselaer Polytechnic Institute (United States)
Abbie Watnik, U.S. Naval Research Laboratory (United States)
Zeev Zalevsky, Bar-Ilan University (Israel)
Yunhui Zhu, Virginia Polytechnic Institute and State University
(United States)
Chao Zuo, Nanjing University of Science and Technology (China)
