Volume 13017

Proceedings of SPIE 0277-786X, V. 13017

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Machine Learning in Photonics, edited by Francesco Ferranti, Mehdi Keshavarz Hedayati, Andrea Fratalocchi, Proc. of SPIE Vol. 13017, 1301701 · © 2024 SPIE
0277-786X · doi: 10.1117/12.3037971

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Machine Learning in Photonics*, edited by Francesco Ferranti, Mehdi Keshavarz Hedayati, Andrea Fratalocchi, Proc. of SPIE 13017, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

MACHINE LEARNING FOR PHOTONIC SYSTEMS I

13017 02 **Generative model for multiple-purpose inverse design and forward prediction of disordered waveguides in linear and nonlinear regimes** [13017-2]

13017 03 **Non-destructive underground fiber Bragg grating sensing system with ResNet prediction for root phenotyping** [13017-3]

MACHINE LEARNING FOR PHOTONIC SYSTEMS III

13017 04 **Hardware AI-empowered ultrasensitive detection** [13017-9]

13017 05 **AI-driven free space quantum communications in the third telecom window** [13017-6]

13017 06 **Nonvolatile actuation of a slot microring resonator through photochromic molecular infiltration** [13017-78]

INVERSE DESIGN I

13017 07 **Optimization by a genetic algorithm of nanopyramidal broadband quasi-perfect absorbers with deeper insight into the stability of optimal solutions** [13017-14]

13017 08 **Topology optimization of soft matter diffraction gratings** [13017-15]

INVERSE DESIGN II

13017 09 **Inverse design of lateral hybrid metasurfaces: an AI approach** [13017-18]

13017 0A **Deep learning for inverse design of dielectric nanostructures with distinguishable RGB color signatures on dark-field microscopy** [13017-19]

13017 0B **AI-based optical materials discovery** [13017-20]

INVERSE DESIGN III

13017 0C **Machine learning enabled inverse design of structural colour (Invited Paper)** [13017-21]

13017 0D **Wavelength-dependent responses and machine learning in nanophotonics modeling** [13017-23]

13017 0E **Inverse design of bright, dielectric metasurfaces color filters based on back-propagation and multi-valued artificial neural networks** [13017-24]

13017 0F **Experimental machine learning for aperiodic wafer-scale photonics inverse design** [13017-25]

13017 0G **Time-domain topology optimization for dispersive and broadband inverse design in nanophotonics (Invited Paper)** [13017-26]

PHOTONIC NEURAL NETWORKS I

13017 0H **Link loss analysis of integrated linear weight bank within silicon photonic neural network** [13017-33]

13017 0I **Photonics and machine learning: a powerful partnership for sensing (Invited Paper)** [13017-34]

PHOTONIC NEURAL NETWORKS II

13017 0J **Ultrafast all-optical nonlinear activator employing silicon/graphene hybrid integration** [13017-36]

13017 0K **Three-dimensional integrated optical neural network** [13017-38]

PHOTONIC NEURAL NETWORKS III

13017 0L **Optical neural networks trained in situ with reinforcement learning (Best Student Paper Award)** [13017-42]

13017 0M **Arbitrarily programmable wave propagation on a photonic chip** [13017-43]

PHOTONIC COMPUTING MACHINES

13017 0N **Spatial photonic machines for large-scale computing and polarization imaging (Invited Paper)** [13017-44]

13017 0O **Improving photonic Ising machines by way of a stability analysis of steady states** [13017-45]

13017 0P **Understanding the influence of hardware resolution on the performance of photonic Ising machines** [13017-46]

SUBSTRATES AND ALGORITHMS FOR LARGE PHOTONIC NEURAL NETWORKS

13017 0Q **Investigation of optimal learning conditions in gain-controlled nonlinear wave reservoirs** [13017-48]

13017 0R **Memory capacity analysis of time-delay reservoir computing based on silicon microring resonator nonlinearities** [13017-49]

13017 0S **Large-scale neural network in passive silicon photonics for biologically plausible learning** [13017-50]

MACHINE LEARNING AND PHOTONICS: ACROSS DOMAINS

13017 0T **Performance tradeoffs of general-purpose digital hardware and application-specific analog hardware** [13017-53]

POSTER SESSION

13017 0U **Deep learning-based macro-bending loss detection by plastic optical fiber specklegram analysis** [13017-57]

13017 0V **Exploring metal-organic framework phase change materials via machine learning approach** [13017-58]

13017 0W **Machine learning-enhanced dual-task processor for next generation access networks** [13017-59]

13017 0X **Evaluation of action spaces for reinforcement learning in optical design** [13017-61]

13017 0Y **Design of classification-based photonic crystal sensor for chemical substance detection** [13017-62]

13017 0Z **Advanced machine learning-powered tunable optical signal processor for precise chromatic dispersion compensation in analog B5G/6G mobile fronthaul networks** [13017-63]

13017 10 **Cascading photonic reservoirs with deep neural networks increases computational performance** [13017-65]

13017 11 **Physics-informed machine learning for programmable photonic circuits** [13017-67]

13017 12 **Temporal simulations of a network of degenerate optical parametric oscillators for solving combinatorial optimization problems** [13017-68]

13017 13 **A machine learning-based analysis of a reconfigurable 1x2 logic gate operated through an externally-induced metamaterial** [13017-69]

13017 14 **All-optical output layer in photonic extreme learning machines** [13017-70]

13017 15 **Acoustic insights: advancing object classification in urban landscapes using distributed acoustic sensing and convolutional neural networks** [13017-71]

13017 16 **Enabling optical extreme learning machines with nonlinear optics** [13017-75]

13017 17 **Increasing the nonlinear computational capacity of a spatial photonic reservoir computing system** [13017-76]

13017 18 **Random forest modelling as a tool for propagation and bend excess loss minimization on silicon nitride waveguide platforms** [13017-77]

13017 19 **Parallel processing of spatial photonic Ising machines using spatial multiplexing** [13017-79]

DIGITAL POSTER SESSION

13017 1A **Data-driven intelligent design and optimization of chiral meta-devices** [13017-72]

Conference Committee

Symposium Chairs

Francis Berghmans, Vrije Universiteit Brussel (Belgium)
Thierry Georges, Oxxius SA (France)
Anna Mignani, Istituto di Fisica Applicata "Nello Carrara" (Italy)
Paul Montgomery, Université de Strasbourg (France)

Programme Track Chair

Laurent Vivien, Centre de Nanosciences et de Nanotechnologies (France)

Conference Chairs

Francesco Ferranti, Vrije Universiteit Brussel (Belgium)
Mehdi Keshavarz Hedayati, Durham University (United Kingdom)
Andrea Fratalocchi, King Abdullah University of Science and Technology (Saudi Arabia)

Conference Programme Committee

Alexandra Boltasseva, Purdue University (United States)
Daniel Brunner, FEMTO-ST (France)
Francesco Da Ros, Danmarks Tekniske Universitet (Denmark)
Jonathan A. Fan, Stanford University (United States)
Ryan Hamerly, Massachusetts Institute of Technology (United States)
Wei Ma, Zhejiang University (China)
Otto L. Muskens, University of Southampton (United Kingdom)
Tatsuhiro Onodera, Cornell University (United States)
Francesca Parmigiani, Microsoft Research (United Kingdom)
Lorenzo Pavesi, Università degli Studi di Trento (Italy)
Junsuk Rho, Pohang University of Science and Technology (Korea, Republic of)
Bhavin J. Shastri, Queen's University (Canada)
Peter R. Wiecha, Laboratoire d'analyse et d'architecture des systèmes CNRS (France)
Nathan Youngblood, University of Pittsburgh (United States)
