SPIE

Volume 7828

Proceedings of SPIE, 0277-786X, v. 7828

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optics in Atmospheric Propagation and Adaptive Systems XIII*, edited by Karin Stein, John D. Gonglewski, Proceedings of SPIE Vol. 7828 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SESSION 1 MODELLING OF THE ENVIRONMENT

- 7828 02 **An overview of MATISSE-v2.0 (Invited Paper)** [7828-01]
L. Labarre, K. Caillault, S. Fauqueux, C. Malherbe, A. Roblin, B. Rosier, P. Simoneau, ONERA (France)
- 7828 03 **Multiresolution infrared optical properties for Gaussian sea surfaces: theoretical validation in the one-dimensional case** [7828-02]
S. Fauqueux, K. Caillault, P. Simoneau, L. Labarre, ONERA (France)
- 7828 04 **EOSTAR Pro: a flexible extensive library to assess EO sensor performance** [7828-03]
A. M. J. van Eijk, M. A. C. Degache, D.-J. J. de Lange, TNO Defence, Security and Safety (Netherlands); S. M. Hammel, D. S. Tsintikidis, Space and Naval Warfare Systems Command (United States)
- 7828 05 **Neon: the UK Met office electro-optic tactical decision aid-current and future capability (Invited Paper)** [7828-04]
S. Fox, D. Wilson, W. Lewis, Met Office (United Kingdom)
- 7828 06 **Global predictions of the optical sensing through turbulence** [7828-05]
S. Cheinet, Institut Saint-Louis (France); K. Weiss-Wrana, Direction Générale pour l'Armement (France); Y. Hurtaud, Fraunhofer Institute of Optronics, System Technologies and Image Exploitation (France); A. Beljaars, European Ctr. for Medium-Range Weather Forecasts (United Kingdom)
- 7828 07 **High-speed and high-power vertical-cavity surface-emitting lasers based on InP suitable for telecommunication and gas sensing** [7828-06]
T. Gruendl, Technische Univ. München (Germany); K. Zogal, Technische Univ. Darmstadt (Germany); M. Mueller, R. D. Nagel, Technische Univ. München (Germany); S. Jatta, Technische Univ. Darmstadt (Germany); K. Geiger, C. Grasse, G. Boehm, Technische Univ. München (Germany); M. Ortsiefer, Vertilas GmbH (Germany); R. Meyer, Technische Univ. München (Germany); P. Meissner, Technische Univ. Darmstadt (Germany); M.-C. Amann, Technische Univ. München (Germany)

SESSION 2 CHARACTERIZATION OF ATMOSPHERIC TURBULENCE

- 7828 08 **Study of turbulence effects for a free-space optical link over water** [7828-07]
R. Mackey, M. Chen, National Univ. of Ireland, Galway (Ireland); A. Lambert, National Univ. of Ireland, Galway (Ireland) and Univ. of New South Wales (Australia); D. Mackey, A. Goncharov, National Univ. of Ireland, Galway (Ireland)

- 7828 09 **Preliminary results of the FATMOSE atmospheric propagation trials in the False Bay, South Africa, November 2009–July 2010** [7828-08]
A. N. de Jong, P. J. Fritz, K. W. Benoist, A. M. J. van Eijk, P. B. W. Schwering, TNO Defence, Security and Safety (Netherlands); W. H. Gunter, G. Vrahimis, F. J. October, Institute for Maritime Technology (South Africa)
- 7828 0A **Passive cross-wind remote sensing using optical turbulence-induced fluctuations** [7828-09]
O. Porat, J. Shapira, Soreq Nuclear Research Ctr. (Israel)
- 7828 0B **C₂_n profile measurement from Shack-Hartmann data: experimental validation and exploitation** [7828-10]
N. Védrenne, A. Bonnefois Montmerle, C. Robert, V. Michau, J. Montri, B. Fleury, ONERA (France)

SESSION 3 PROPAGATION THROUGH TURBULENT MEDIA

- 7828 0C **The effect of dense aerosol cloud on the 3D information contain of flash Lidar** [7828-11]
G. Tremblay, AEREX Avionique inc. (Canada); X. Cao, Royal Military College of Canada (Canada); G. Roy, Defence Research and Development Canada (Canada)
- 7828 0D **SWIR Hemispherical Air-Glow Plotting System SHAPS** [7828-12]
J. D. Gonglewski, M. M. Myers, Air Force Research Lab. (United States); D. C. Dayton, Applied Technology Associates (United States); G. Fertig, Air Force Research Lab. (United States); J. Allen, R. Nolasco, Applied Technology Associates (United States); F. Maia, Textron Defense Systems (United States)
- 7828 0E **Spatial and temporal variability of SWIR air glow measurements** [7828-13]
D. Dayton, J. Allen, Applied Technology Associates (United States); J. Gonglewski, M. Myers, G. Fertig, Air Force Research Lab. (United States); R. Nolasco, Applied Technology Associates (United States); F. Maia, Textron Defense Systems Kauai (United States)
- 7828 0F **Problems related to the beam propagation in the tubulent atmosphere** [7828-14]
F. V. Shugaev, E. N. Terentiev, L. S. Shtemenko, O. I. Dokukina, T. A. Petrova, M. V. Lomonosov Moscow State Univ. (Russian Federation)

SESSION 4 ADAPTIVE OPTIC SYSTEMS

- 7828 0H **Incoherent phase-compensated imaging based on a field scattered by rough surface** [7828-16]
V. V. Dudorov, V. V. Kolosov, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
- 7828 0I **Possibilities of LGS application** [7828-17]
L. A. Bolbasova, V. P. Lukin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation) and Tomsk State Univ. (Russian Federation)
- 7828 0K **Adaptive optics system for the observation of terrestrial point-like sources: results and problems** [7828-20]
G. Marchi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

- 7828 0L **SCALPEL: a long range free-space optical communication system with adaptive optics in the MIR bandwidth** [7828-21]
A. Montmerle Bonnefois, R. Biérent, M. Raybaut, A. Godard, S. Derelle, A. Durécu, V. Michau, M. Lefebvre, N. Védrenne, M.-T. Velleut, ONERA (France)

SESSION 5 IMAGE RECONSTRUCTION

- 7828 0M **The impact of low signal-to-noise ratio values on the achievability of Cramér-Rao lower bounds with multi-frame blind deconvolution algorithms** [7828-22]
C. L. Matson, Air Force Research Lab. (United States); M. Flanagan, SAIC (United States); R. A. Vincent, Air Force Institute of Technology (United States)
- 7828 0N **Software-based mitigation of image degradation due to atmospheric turbulence** [7828-23]
C. S. Huebner, C. Scheifling, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
- 7828 0O **Iterative correction procedure for images degraded by turbulence** [7828-24]
C. Scheifling, G. Marchi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

POSTER SESSION

- 7828 0P **Wavefront sensors for adaptive optical systems** [7828-18]
V. P. Lukin, N. N. Botygina, O. N. Emaleev, P. A. Konyaev, Zuev Institute of Atmospheric Optics (Russian Federation)

Author Index

Conference Committee

Symposium Chair

Steven P. Neeck, NASA Headquarters (United States)

Symposium Co-Chair

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Conference Chairs

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

John D. Gonglewski, Air Force Research Laboratory (United States)

Program Committee

David C. Dayton, Applied Technology Associates (United States)

Denis Dion, Defence Research and Development Canada (Canada)

Stephen M. Hammel, Space and Naval Warfare Systems Command (United States)

Vladimir P. Lukin, Institute of Atmospheric Optics (Russian Federation)

Charles L. Matson, Air Force Research Laboratory (United States)

Sergio R. Restaino, U.S. Naval Research Laboratory (United States)

Jennifer C. Ricklin, Lockheed Martin Corporation (United States)

Arthur D. van Rheenen, Norwegian Defence Research Establishment (FFI) (Norway)

Jim F. Riker, Air Force Research Laboratory (United States)

Marc J. F. Séchaud, ONERA (France)

Mikhail A. Vorontsov, U.S. Army Research Laboratory (United States)

Session Chairs

- 1 Modelling of the Environment
Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
- 2 Characterization of Atmospheric Turbulence
Marc J. F. Séchaud, ONERA (France)
- 3 Propagation through Turbulent Media
Denis Dion, Defence Research and Development Canada (Canada)

- 4 Adaptive Optic Systems
John D. Goglewski, Air Force Research Laboratory (United States)
- 5 Image Reconstruction
David C. Dayton, Applied Technology Associates (United States)
