

PROCEEDINGS OF SPIE

Next Generation (Nano) Photonic and Cell Technologies for Solar Energy Conversion IV

**Oleg V. Sulima
Gavin Conibeer**
Editors

**25–27 August 2013
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 8824

Proceedings of SPIE 0277-786X, V. 8824

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Next Generation (Nano) Photonic and Cell Technologies for Solar Energy Conversion IV,
edited by Oleg V. Sulima, Gavin Conibeer, Proc. of SPIE Vol. 8824, 882401 · © 2013 SPIE
CCC code: 0277-786X/13/\$18 · doi: 10.1117/12.2045821

Proc. of SPIE Vol. 8824 882401-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Next Generation (Nano) Photonic and Cell Technologies for Solar Energy Conversion IV*, edited by Oleg V. Sulima, Gavin Conibeer, Proceedings of SPIE Vol. 8824 (SPIE, Bellingham, WA, 2013) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

SESSION 1 NOVEL MATERIALS AND DESIGNS FOR SOLAR ENERGY CONVERSION

- 8824 05 **Simulation of photovoltaic performance in a thin film, hybrid heterojunction incorporating a nanoscale semiconductor spectral sensitizer** [8824-4]
S. A. De Valle, J. B. Kana Kana, K. Simmons-Potter, B. G. Potter Jr., Univ. of Arizona (United States)

SESSION 2 LIGHT MANAGEMENT IN OPV DEVICES

- 8824 07 **Light trapping in nanotube-based dye-sensitized solar cells** [8824-8]
S. Foster, S. John, Univ. of Toronto (Canada)

SESSION 3 PHOTON UP- AND DOWN-CONVERSION

- 8824 08 **Nanostructured upconverters for improved solar cell performance (Invited Paper)** [8824-9]
R. W. MacQueen, The Univ. of Sydney (Australia); T. F. Schulze, Helmholtz-Zentrum Berlin (Germany); T. Khoury, Lebanese Univ. (Lebanon); Y. Y. Cheng, The Univ. of Sydney (Australia); B. Stannowski, K. Lips, Helmholtz-Zentrum Berlin (Germany); M. J. Crossley, T. W. Schmidt, The Univ. of Sydney (Australia)
- 8824 0A **Photonic structures for enhanced upconversion** [8824-11]
B. Herter, S. Wolf, S. Fischer, J. Gutmann, B. Bläsi, Fraunhofer-Institut für Solare Energiesysteme (Germany); J. C. Goldschmidt, Fraunhofer-Institut für Solare Energiesysteme (Germany) and Imperial College (United Kingdom)

SESSION 4 NANOSTRUCTURES FOR LIGHT MANAGEMENT I

- 8824 0D **Nanophotonic light trapping in polycrystalline silicon thin-film solar cells using periodically nanoimprint-structured glass substrates** [8824-15]
C. Becker, J. Xavier, V. Preidel, P. Wyss, T. Sontheimer, B. Rech, J. Probst, C. Hülsen, B. Löchel, A. Erko, Helmholtz-Zentrum Berlin für Materialien und Energie GmbH (Germany); S. Burger, F. Schmidt, Zuse Institute Berlin (Germany); F. Back, E. Rudigier-Voigt, SCHOTT AG (Germany)

SESSION 5 NANOWIRE AND QUANTUM DOT CELLS

- 8824 0I **PbS quantum dot thin film solar cells using a CdS window layer** [8824-20]
K. P. Bhandari, H. Mahabaduge, The Univ. of Toledo (United States); J. Gao, National Renewable Energy Lab. (United States); R. J. Ellingson, The Univ. of Toledo (United States)
- 8824 0K **Light trapping enhancement in ordered and disordered silicon nanowire based solar cells** [8824-22]
M. Foldyna, L. Yu, S. Misra, P. Roca i Cabarrocas, Lab. de Physique des Interfaces et Couches Minces, CNRS, Ecole Polytechnique (France)

SESSION 6 NANOSTRUCTURES FOR LIGHT MANAGEMENT II

- 8824 0L **Solar light trapping in slanted conical-pore photonic crystals** [8824-23]
S. Eyderman, Univ. of Toronto (Canada); S. John, Univ. of Toronto (Canada) and King Abdulaziz Univ. (Saudi Arabia); A. Deinega, Univ. of Toronto (Canada)
- 8824 0M **Multilayer structures with highly directional absorptivity for solar thermophotovoltaics** [8824-24]
C. H. Granier, Louisiana State Univ. (United States); F. O. Afzal, Louisiana State Univ. (United States) and Truman State Univ. (United States); G. Veronis, J. P. Dowling, Louisiana State Univ. (United States)

SESSION 7 NANOSCALE RECTENNAS

- 8824 0O **Overview of optical rectennas for solar energy harvesting (Invited Paper)** [8824-26]
Z. Zhu, S. Joshi, B. Pelz, G. Moddel, Univ. of Colorado (United States)
- 8824 0P **The role of geometry in nanoscale rectennas for rectification and energy conversion** [8824-27]
N. M. Miskovsky, P. H. Cutler, The Pennsylvania State Univ. (United States) and Scitech Associates, LLC (United States); A. Mayer, Univ. of Namur (Belgium); B. G. Willis, Univ. of Connecticut (United States); D. T. Zimmerman, G. J. Weisel, J. M. Chen, The Pennsylvania State Univ. (United States); T. E. Sullivan, Temple Univ. (United States); P. B. Lerner, Scitech Associates, LLC (United States)
- 8824 0Q **Bounds for the rectification efficiency of solar radiation** [8824-28]
H. Mashaal, J. M. Gordon, Ben-Gurion Univ. of the Negev (Israel)
- 8824 0S **Step tunneling enhanced asymmetry in metal-insulator-insulator-metal (MIIM) diodes for rectenna applications** [8824-31]
N. Alimardani, J. F. Conley Jr., Oregon State Univ. (United States)

SESSION 8 NOVEL APPROACHES TO SOLAR ENERGY CONVERSION

- 8824 0T **Prospects of graphene electrodes in photovoltaics (Invited Paper)** [8824-32]
Y. Khatami, W. Liu, J. Kang, K. Banerjee, Univ. of California, Santa Barbara (United States)

POSTER SESSION

- 8824 0X **Biomimetic antireflective AlInP nanostructures fabricated by lithography-free method for solar cell applications** [8824-36]
C. I. Yeo, J. B. Kim, K. W. Park, Y. T. Lee, Gwangju Institute of Science and Technology (Korea, Republic of)
- 8824 0Z **Spectrum upconversion and downconversion in (Tm³⁺,Yb³⁺) and (Tb³⁺,Yb³⁺) co-doped fluorosilicate glass** [8824-38]
Z. Pan, R. Akrobetu, S. H. Morgan, Fisk Univ. (United States)
- 8824 11 **Coated Si microwire array solar cells for better light trapping** [8824-40]
E. Lee, M. Gwon, Y. Cho, D.-W. Kim, Ewha Womans Univ. (Korea, Republic of)
- 8824 13 **Down-conversion effect on GaAs single junction solar cell using CdSe quantum dots** [8824-12]
J.-S. Park, J. Kyhm, H. Ko, J. D. Song, E. Kim, I. K. Han, Korea Institute of Science and Technology (Korea, Republic of)

Author Index

Conference Committee

Symposium Chair

Martha Symko-Davies, National Renewable Energy Laboratory
(United States)

Conference Chairs

Oleg V. Sulima, GE Global Research (United States)
Gavin Conibeer, The University of New South Wales (Australia)

Conference Program Committee

Amanda J. Chatten, Imperial College London (United Kingdom)
Andrew J. Ferguson, National Renewable Energy Laboratory
(United States)
Alberto Salleo, Stanford University (United States)
Sean E. Shaheen, University of Denver (United States)
Loucas Tsakalakos, GE Global Research (United States)
Wilfried G. J. H. M. van Sark, Universiteit Utrecht (Netherlands)
Xianfan Xu, Purdue University (United States)

Session Chairs

- 1 Novel Materials and Designs for Solar Energy Conversion
Oleg V. Sulima, GE Global Research (United States)
- 2 Light Management in OPV Devices
Andrew J. Ferguson, National Renewable Energy Laboratory
(United States)
- 3 Photon Up- and Down-Conversion
Gavin Conibeer, The University of New South Wales (Australia)
- 4 Nanostructures for Light Management I
Sean E. Shaheen, University of Denver (United States)
- 5 Nanowire and Quantum Dot Cells
Timothy W. Schmidt, The University of Sydney (Australia)
- 6 Nanostructures for Light Management II
Oleg V. Sulima, GE Global Research (United States)
- 7 Nanoscale Rectennas
Xianfan Xu, Purdue University (United States)

- 8 Novel Approaches to Solar Energy Conversion
Peter Bermel, Purdue University (United States)
