

PROCEEDINGS OF SPIE

Optical and Infrared Interferometry and Imaging V

Fabien Malbet
Michelle J. Creech-Eakman
Peter G. Tuthill
Editors

27 June – 1 July 2016
Edinburgh, United Kingdom

Sponsored by
SPIE

Cooperating Organizations

American Astronomical Society (United States) • Australian Astronomical Observatory (Australia) • Association of Universities for Research in Astronomy (AURA) • Canadian Astronomical Society (CASCA) (Canada) • Canadian Space Agency (Canada) • European Astronomical Society (Switzerland) • European Southern Observatory (Germany) • National Radio Astronomy Observatory • Royal Astronomical Society (United Kingdom) • Science & Technology Facilities Council (United Kingdom)

Published by
SPIE

Volume 9907

Proceedings of SPIE 0277-786X, V. 9907

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical and Infrared Interferometry and Imaging V, edited by Fabien Malbet,
Michelle J. Creech-Eakman, Peter G. Tuthill, Proc. of SPIE Vol. 9907, 990701
© 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2254897

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/16/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a six-digit CID article numbering system structured as follows:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- xi Authors
- xvii Conference Committee
- xxi Introduction

Part One

FACILITIES I

- 9907 02 **The Navy Precision Optical Interferometer: an update (Invited Paper)** [9907-1]
- 9907 03 **An update on the CHARA array (Invited Paper)** [9907-2]
- 9907 04 **Overview of LBTI: a multipurpose facility for high spatial resolution observations (Invited Paper)** [9907-3]

FACILITIES II

- 9907 05 **A new path to first light for the Magdalena Ridge Observatory interferometer (Invited Paper)** [9907-4]
- 9907 06 **The 2nd generation VLTI path to performance (Invited Paper)** [9907-5]

INSTRUMENTS

- 9907 0A **An overview of the mid-infrared spectro-interferometer MATISSE: science, concept, and current status (Invited Paper)** [9907-9]
- 9907 0B **Imaging capabilities of the VLTI/MATISSE spectro-interferometric instrument (Invited Paper)** [9907-10]
- 9907 0C **MATISSE: alignment, integration, and test phase first results** [9907-11]

SCIENCE I

- 9907 0D **Imaging protoplanets: observing transition disks with non-redundant masking (Invited Paper)** [9907-12]

APERTURE MASKING I

- 9907 0E **A conceptual scheme for cophasing across gaps in segmented pupils with a laser guide star Fizeau interferometer (Invited Paper)** [9907-13]

SPECKLE INTERFEROMETRY

- 9907 0J **Speckle imaging at large telescopes: current results and future prospects (Invited Paper)** [9907-18]
- 9907 0K **SRAO: the first southern robotic AO system** [9907-19]

SCIENCE II

- 9907 0L **The role of Fizeau interferometry in planetary science** [9907-20]

INTENSITY INTERFEROMETRY

- 9907 0M **Intensity interferometry: optical imaging with kilometer baselines (Invited Paper)** [9907-21]
- 9907 0N **Intensity interferometry with Aqueye+ and Iqueye in Asiago** [9907-22]
- 9907 0P **On the measurement of intensity correlations from laboratory and astronomical sources with SPADs and SNSPDs** [9907-24]

SCIENCE III

- 9907 0Q **The orbit of the mercury-manganese binary 41 Eridani** [9907-25]

SCIENCE IV

- 9907 0R **Infrared interferometry and AGNs: Parsec-scale disks and dusty outflows (Invited Paper)** [9907-26]

SPACE INTERFEROMETRY

- 9907 0S **The path to interferometry in space (Invited Paper)** [9907-27]
- 9907 0T **Optics of Balloon Experimental Twin Telescope for Infrared Interferometry (BETTI): delay lines and alignment** [9907-28]
- 9907 0U **Recent experiments conducted with the Wide-field imaging interferometry testbed (WIIT)** [9907-29]

SCIENCE V

- 9907 0V **The innermost astronomical units of protoplanetary disks (Invited Paper)** [9907-30]

DATA PROCESSING I

- 9907 0X **Making high-accuracy null depth measurements for the LBTI exozodi survey** [9907-32]
- 9907 0Z **Direct temperature map estimation in optical long baseline interferometry** [9907-138]

DATA PROCESSING II

- 9907 10 **OIFITS version 2: the new standard for optical/IR interferometry data exchange (Invited Paper)** [9907-34]
- 9907 11 **ASPRO2: get ready for VLTI's instruments GRAVITY and MATISSE** [9907-35]
- 9907 12 **Spectrally dispersed Fourier-phase analysis for redundant apertures** [9907-36]

SCIENCE VI

- 9907 13 **Enabling the direct detection of earth-sized exoplanets with the LBTI HOSTS project: a progress report** [9907-37]

SCIENCE VII

- 9907 14 **Imaging transient events at high angular resolution (Invited Paper)** [9907-38]

DETECTORS FOR INTERFEROMETRY

- 9907 15 **Fast sub-electron detectors review for interferometry (Invited Paper)** [9907-39]
- 9907 16 **Progress towards photon-counting infrared arrays for interferometry** [9907-40]

SCIENCE VIII

- 9907 17 **Interferometric studies of disk-eclipsed binary star systems (Invited Paper)** [9907-41]

ASTROPHOTONICS

- 9907 18 **Astronomical photonics in the context of infrared interferometry and high-resolution spectroscopy (Invited Paper)** [9907-42]
- 9907 19 **Increasing the spectral coverage of interferometric integrated optics: K/L and N-laser-written beam combiners** [9907-43]
- 9907 1A **ALOHA project: how nonlinear optics can boost interferometry to propose a new generation of instrument for high-resolution imaging** [9907-44]

SCIENCE IX

- 9907 1B **Evolved stars at high angular resolution: present and future (Invited Paper)** [9907-45]

INTERFEROMETRY IMAGING

- 9907 1C **Interferometric image reconstruction: techniques, results, and future direction (Invited Paper)** [9907-46]
- 9907 1D **The 2016 interferometric imaging beauty contest (Invited Paper)** [9907-47]
- 9907 1E **Global optimization for image restoration in optical/IR interferometry** [9907-48]

FRINGE TRACKING

- 9907 1F **Hierarchical fringe tracker to co-phase and coherence very large optical interferometers** [9907-49]
- 9907 1G **Simultaneous water vapor and dry air optical path length measurements and compensation with the large binocular telescope interferometer** [9907-50]

FUTURE INSTRUMENTS

- 9907 1H **Long baseline interferometry in the visible: first results of the FRIEND project** [9907-51]

PLANET FORMATION IMAGER

- 9907 1K **Planet Formation Imager (PFI): science vision and key requirements** [9907-54]
- 9907 1L **Status of the Planet Formation Imager (PFI) concept (Invited Paper)** [9907-55]

Part Two

PLANET FORMATION IMAGER II

- 9907 1N **Beam combination schemes and technologies for the Planet Formation Imager** [9907-57]
9907 1O **Architecture design study and technology road map for the Planet Formation Imager (PFI)** [9907-58]

WEDNESDAY POSTER SESSION

- 9907 1Q **How to create space inside the VLTI: PIONIER 3D project** [9907-60]
9907 1S **Fundamental gain in high-contrast imaging with the large binocular telescope interferometer** [9907-62]
9907 1T **Sensitivity to differential piston and to adaptive optics errors with the Large Binocular Telescope Interferometer** [9907-63]
9907 1W **SCSI: the Southern Connecticut Stellar Interferometer** [9907-66]
9907 1X **Monitoring a decade of seeing at the NPOI with quad cell measurements** [9907-67]
9907 1Z **VLT interferometer upgrade for the 2nd generation of interferometric instruments** [9907-69]
9907 20 **NAOMI: a low-order adaptive optics system for the VLT interferometer** [9907-70]
9907 21 **Control bandwidth improvements in GRAVITY fringe tracker by switching to a synchronous real time computer architecture** [9907-71]
9907 22 **The metrology system of the VLTI instrument GRAVITY** [9907-73]
9907 23 **Data reduction for the MATISSE instrument** [9907-74]
9907 24 **ALOHA/CHARA at 1.55 μm: sensitivity improvement and on-sky ability to detect astronomical sources in H band** [9907-75]
9907 25 **The new classic instrument for the navy precision optical interferometer** [9907-76]
9907 27 **GRAVITY acquisition camera: characterization results** [9907-78]
9907 28 **MATISSE: specifications and expected performances** [9907-79]
9907 2B **H_α controller design for high sensitivity fringe tracking** [9907-82]
9907 2C **Multi-baseline chain bootstrapping with new classic at the NPOI** [9907-83]
9907 2E **C-RED One: the infrared camera using the Saphira e-APD detector** [9907-86]
9907 2F **GRAVITY detector systems** [9907-87]

- 9907 2G **Measuring the thermal sensitivity of a fiber Fabry-Pérot interferometer** [9907-88]
- 9907 2H **Experimental demonstration of a crossed cubes nuller for coronagraphy and interferometry** [9907-89]
- 9907 2I **Khayyam: progress and prospects of coupling a spatial heterodyne spectrometer (SHS) to a Cassegrain telescope for optical interferometry** [9907-90]
- 9907 2K **Results from a multi aperture Fizeau interferometer ground testbed: demonstrator for a future space-based interferometer** [9907-93]
- 9907 2L **Fiber-based heterodyne infrared interferometry: an instrumentation study platform on the way to the proposed Infrared Planet Formation Imager** [9907-94]
- 9907 2O **Recent developments with the visible nulling coronograph** [9907-98]

THURSDAY POSTER SESSION

- 9907 2R **Differential speckle and wide-field imaging for the Gemini-North and WIYN telescopes** [9907-100]
- 9907 2T **Sparse aperture masking with SPHERE** [9907-102]
- 9907 2U **Interferometric direct imaging properties of a BIGRE-DAM device in laboratory** [9907-103]
- 9907 30 **Chalcogenide glass planar MIR couplers for future chip based Bracewell interferometers** [9907-109]
- 9907 31 **All-in-one 4-telescope beam combination with a zig-zag array of waveguides** [9907-110]
- 9907 32 **ALOHA @3.39 μm: implementation of the up-conversion interferometer in the L band** [9907-111]
- 9907 33 **6- and 8-telescope discrete beam combiners** [9907-112]
- 9907 34 **Model-based calculations of fiber output fields for fiber-based spectroscopy** [9907-113]
- 9907 35 **Use of a photonic lantern into an image plane fiber beam combiner** [9907-114]
- 9907 36 **Fringe tracking at longer wavelengths using near- and mid-IR integrated optics devices** [9907-115]
- 9907 38 **Novel multi-telescopes beam combiners for next generation instruments (FIRST/SUBARU)** [9907-117]
- 9907 39 **Recent results on photonic devices made by laser writing: 3D 3T near IR waveguides, mid-IR spectrometers and electro-optic beam combiners** [9907-118]
- 9907 3B **Interferometric field of view measurements at the VLTI** [9907-120]
- 9907 3D **Effective a posteriori co-phasing of interferometric fringe data** [9907-122]

- 9907 3E **P-REx: the piston drift reconstruction experiment** [9907-123]
- 9907 3F **Image restoration for a hypertelescope** [9907-124]
- 9907 3G **Rotation and translation registration of bandlimited interferometric images using a chirp z-transform** [9907-125]
- 9907 3H **Image reconstruction method IRBis for optical/infrared long-baseline interferometry** [9907-126]
- 9907 3I **High fidelity imaging of geosynchronous satellites with the MROI** [9907-127]
- 9907 3K **Interbands phase models for polychromatic image reconstruction in optical interferometry** [9907-129]
- 9907 3N **User-friendly imaging algorithms for interferometry** [9907-132]
- 9907 3P **An interferometric view of binary stars** [9907-135]
- 9907 3Q **Grown-up stars physics with MATISSE** [9907-136]
- 9907 3R **Sharp images of WR104** [9907-137]
- 9907 3S **Science with MATISSE** [9907-139]
- 9907 3T **Observing the PTPS sample of evolved exoplanet host candidates using the NPOI** [9907-140]
- 9907 3V **First year report of the Optical Interferometry DataBase** [9907-142]
- 9907 3W **Co-phasing the planet formation imager** [9907-144]
- 9907 3X **Practical beam transport for PFI** [9907-145]
- 9907 40 **The Wide-field Imaging Interferometry Testbed (WIIT): recent progress in the simulation and synthesis of WIIT data** [9907-148]
- 9907 41 **Stray light evaluation for the astrometric gravitation probe mission** [9907-149]
- 9907 42 **AGP (Astrometric Gravitation Probe) optical design report** [9907-150]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Colin Cunningham, UK Astronomy Technology Centre
(United Kingdom)

Masanori Iye, National Astronomical Observatory of Japan (Japan)

Symposium Co-chairs

Allison A. Barto, Ball Aerospace & Technologies Corporation
(United States)

Suzanne K. Ramsay, European Southern Observatory (Germany)

Conference Chairs

Fabien Malbet, Institut de Planétologie et d'Astrophysique de
Grenoble (France)

Michelle J. Creech-Eakman, New Mexico Institute of Mining and
Technology (United States)

Peter G. Tuthill, The University of Sydney (Australia)

Conference Program Committee

Ellyn K. Baines, U.S. Naval Research Laboratory (United States)

Fabien Baron, Georgia State University (United States)

Jean-Philippe Berger, European Southern Observatory (Germany)

Elliott P. Horch, Southern Connecticut State University (United States)

Takayuki Kotani, National Astronomical Observatory of Japan
(Japan)

Lucas Labadie, Universität zu Köln (Germany)

Keiichi Ohnaka, Universidad Católica del Norte (Chile)

Claudia Paladini, Université Libre de Bruxelles (Belgium)

Jayadev K. Rajagopal, National Optical Astronomy Observatory
(United States)

Andrew Skemer, The University of Arizona (United States)

Isabelle Tallon-Bosc, Centre de Recherche Astronomique de Lyon
(France)

Session Chairs

1 Facilities I

Ellyn K. Baines, U.S. Naval Research Laboratory (United States)

2 Facilities II

Ellyn K. Baines, U.S. Naval Research Laboratory (United States)

- 3 Instruments
David F. Buscher, University of Cambridge (United Kingdom)
 - 4 Science I
Fabien Baron, Georgia State University (United States)
 - 5 Aperture Masking I
Fabien Baron, Georgia State University (United States)
 - 6 Aperture Masking II
Fabien Baron, Georgia State University (United States)
 - 7 Speckle Interferometry
Andrew J. Skemer, University of California, Santa Cruz (United States)
 - 8 Science II
Andrew J. Skemer, University of California, Santa Cruz (United States)
 - 9 Intensity Interferometry
Elliott P. Horch, Southern Connecticut State University (United States)
 - 10 Science III
Elliott P. Horch, Southern Connecticut State University (United States)
 - 11 Science IV
Lucas Labadie, Universität zu Köln (Germany)
 - 12 Space Interferometry
Lucas Labadie, Universität zu Köln (Germany)
 - 13 Science V
Henrique R. Schmitt, U.S. Naval Research Laboratory (United States)
 - 14 Data Processing I
Henrique R. Schmitt, U.S. Naval Research Laboratory (United States)
 - 15 Data Processing II
Henrique R. Schmitt, U.S. Naval Research Laboratory (United States)
 - 16 Science VI
Henrique R. Schmitt, U.S. Naval Research Laboratory (United States)
- Poster Previews
Fabien Malbet, Institut de Planétologie et d'Astrophysique de Grenoble (France)

- 17 Science VII
Michelle J. Creech-Eakman, New Mexico Institute of Mining and Technology (United States)
- 18 Detectors for Interferometry
Michelle J. Creech-Eakman, New Mexico Institute of Mining and Technology (United States)
- 19 Science VIII
John D. Monnier, University of Michigan (United States)
- 20 Astrophotonics
John D. Monnier, University of Michigan (United States)
- 21 Science IX
Gilles Duvert, Institut de Planétologie et d'Astrophysique de Grenoble (France)
- 22 Interferometry Imaging
Gilles Duvert, Institut de Planétologie et d'Astrophysique de Grenoble (France)
- 23 Fringe Tracking
Christopher A. Haniff, University of Cambridge (United Kingdom)
- 24 Future Instruments
Christopher A. Haniff, University of Cambridge (United Kingdom)
- 25 Planet Formation Imager
Peter G. Tuthill, The University of Sydney (Australia)
- 26 Planet Formation Imager II
Peter G. Tuthill, The University of Sydney (Australia)
- 27 Interferometry Community
Michelle J. Creech-Eakman, New Mexico Institute of Mining and Technology (United States)
- Closing Remarks
Michelle J. Creech-Eakman, New Mexico Institute of Mining and Technology (United States)

Introduction

Optical and infrared interferometry continues to rapidly develop and deliver unique scientific reach to astrophysics. As astronomy, in general, goes through a transformative phase, our field has encountered both opportunities and challenges. The primary goals of this conference were to allow the attendees to learn firsthand about the exciting capabilities operational at facilities across the globe and to discuss the future prospects for interferometry in technology and instrumentation. Here, the SPIE meeting plays a unique role as the singular venue that brings together interferometrists from the world over.

For this meeting in Edinburgh, key themes were the burgeoning scientific productivity encapsulated in many invited reviews, the emergence of new instrumentation (particularly from photonics), and the continuing development of image reconstruction techniques. Closure-phase measurements and nulling results from large aperture telescopes continue to help push astrophysical investigations of fainter objects. New instrumentation will bring all these aspects together in the very near future, with increasing interest from non-specialists in interferometry thanks to general user facilities and data-reduction software.

This conference has primarily focused on the latest innovations in technology and engineering for ground- and space-based interferometry in the optical and infrared, including new instrumentation, techniques and software. For example, we had many contributions on integrated optics and detectors. Marquee scientific results in areas ranging from young stellar objects to active galactic nuclei have been made possible with milli- and micro-arcsecond angular resolution.

In several important domains, the distinction between interferometry and aperture masking has been dissolving for some years. The newest generation of extremely large telescopes occupy some middle ground where the field of high-resolution imaging with a single aperture—traditionally aperture masking or speckle interferometry—has been powerfully augmented by the advent of high-performing adaptive optics. Although the major surge in interest in space interferometry from the previous decade has abated, there are several smaller missions from balloons to cubesats that are generating significant interest and keeping these ideas alive.

We had an interesting community discussion that allowed introspection and brainstorming for the intermediate and long-term future of interferometry. Scientific and technical opportunities, priorities and new directions in times of limited funding were major themes. This volume presents a total of 102 contributions (a similar total to recent meetings - 96 in 2012, 116 in 2014).

We would like to thank all oral contributors, invited talks and posters who made this conference an important milestone in our domain.

Fabien Malbet
Michelle J. Creech-Eakman
Peter G. Tuthill
