## SESSION (1) PLENARY SESSION

08.45	<b>Opening Address</b>	
09.00	<b>Modelling integrated sensor/actuator functions in realistic environments</b>	<b>1</b>
	V V Varadan, Liang-Chi Chin and V K Varadan Pennsylvania State University, USA Invited Speaker	
09.30	<b>Fiber optic smart structures for aerospace applications</b>	<b>7</b>
	E Udd McDonnell Douglas Electronic Systems Company, USA Invited Speaker	
10.00	<b>A concept of intelligent materials and the current activities of intelligent materials in Japan</b>	<b>13</b>
	T Takagi Ion Engineering Research Institute Corporation, Japan Invited Speaker	
10.30	<b>Smart materials research in the USAF Wright Laboratory</b>	<b>19</b>
	T G Gerardi, R Pachter, R L Crane and W W Adams Wright-Patterson AFB, USA	
10.50	COFFEE	

## SESSION (2) FIBRE OPTIC SENSORS I

11.10	<b>A multifunction sensor for smart structure applications</b>	<b>†</b>
	J R Dunphy United Technologies Research Center, USA Invited Speaker	
11.40	<b>Monitoring of prestressed concrete structures with optical fiber sensors</b>	<b>23</b>
	R Wolff and H-J Miesslerer SICOM GmbH, Germany	
12.00	<b>Sensor system architectures for spatially-resolved dynamic strain measurement using optical fibers</b>	<b>31</b>
	V A Handerek and A J Rogers King's College London, UK	
12.20	<b>Elastic curve recovery by a quasi-distributed polarimetric fiber optic sensor</b>	<b>35</b>
	A Barberis, P Escobar Rojo, V Gusmeroli, C Mariottini, and M Martinelli CISE Tecnologie Innovative SpA, Italy	
12.40	<b>Passive phase interrogation and multiplexing of two-mode fiber strain sensors for smart structures systems</b>	<b>39</b>
	T A Berkoff and A D Kersey Naval Research Laboratory, USA	
13.00	LUNCH	
	<b>Optical-fiber sensor-network for temperature and proximity control</b>	<b>45</b>
	A Mencaglia, M Brenci and A G Mignani IROE-CNR, Italy	

† Paper not available at time of printing. First European Conference on Smart Structures and Materials, edited by Brian Culshaw, Peter G. Gardes, Alister McDonach, Proc. of SPIE Vol. 1777, 177701 · © (1992) 2017 SPIE · CCC code: 0277-786X/17/\$18 · doi: 10.1117/12.2298024

	<b>Digital systems for automatic control of optical resonators used as gravitational waves interferometric detectors</b>	<b>49</b>
	F Barone, E Calloni, R De Rosa, F Fusco, L Milano and G Russo Istituto Nazionale di Fisica Nucleare, Italy and Università di Napoli, Italy L Di Fiore Università di Napoli, Italy	
	<b>Quasi-distributed fiber-optic sensor for simultaneous absolute measurement of strain and temperature</b>	<b>53</b>
	L Wosinski, J P Bétend-Bon, M Breidne, B Sahlgren and R Stubbe Institute of Optical Research, Sweden	
	<b>A digital technique for passive demodulation in a fiber optic homodyne interferometer</b>	<b>57</b>
	W Jin, D Walsh, D Uttamchandani and B Culshaw University of Strathclyde, Glasgow	
	<b>Spatially-weighted optical fiber sensing methods</b>	<b>413</b>
	R O Claus, K A Murphy, B R Fogg and J A Greene Virginia Polytechnic, USA A M Vengsarkar AT & T Bell Laboratories, USA	
	<b>Fiber-grating based strain sensor with phase sensitive detection</b>	<b>61</b>
	A D Kersey Naval Research Laboratory, USA T A Berkoff SFA Inc., USA W W Moray United Technologies Research Center, USA	
<b>SESSION (3)</b>	<b>FIBRE OPTIC SENSORS II/COMPOSITES</b>	
<b>14.10</b>	<b>What do embedded optical fibers really measure?</b>	<b>69</b>
	J S Sirkis and A Dasgupta University of Maryland, USA	
<b>14.30</b>	<b>Fiber Bragg grating sensor demonstration in glass-fiber reinforced polyester composite</b>	<b>73</b>
	H D Simonsen and R Paetsch Per Udsen Co. Aircraft Industry A/S, Denmark J R Dunphy United Technologies Research Center, USA	
<b>14.50</b>	<b>Unidirectional glass reinforced plastic composite monitoring with white light quasi distributed polarimetric sensing network</b>	<b>77</b>
	P Sansonetti, J J Guerin, D Viton, C Gouffier and D Engrand Bertin & CIE, France	
<b>15.10</b>	<b>Composite strain sensing with a combined interferometric and polarimetric fiber-optic strain gauge</b>	<b>81</b>
	N Fürstenau and W Schmidt D.L.R., Germany H-C Goetting Institute for Structural Mechanics, Germany	

15.30	<b>Spatial modulation within embedded fiber optic sensors for smart structures characterization</b>	<b>85</b>
	M A El-Sherif and F K Ko Drexel University, USA	
15.50	<b>COFFEE</b>	
	<b>Experimental application of a phase-strain-temperature model for polarimetric optical fiber strain sensors</b>	<b>89</b>
	P L Nielson Technical University of Denmark, Denmark J S Sirkis and Yu-Lung Lo University of Maryland, USA	
	<b>Process-induced birefringence variations in fiber optic embedded in composite materials</b>	<b>93</b>
	M Turpin, J Chazelas and H Stoppiglia Thomson-CSF, France	
 <b>SESSION (4) SMART SENSING APPLICATIONS</b>		
16.10	<b>The evolution of smart structures/materials</b>	<b>97</b>
	W B Spillman University of Vermont, USA Invited Speaker	
16.40	<b>Finite element analysis of composite laminates containing transversely embedded optical fiber sensors</b>	<b>115</b>
	R Davidson and S S J Roberts AEA Technology, UK	
17.00	<b>Smart structural composites with the ability to monitor vibration and damage</b>	<b>123</b>
	N Shaikh, S Chen, Y Lu and D Timm University of Nebraska, USA	
17.20	<b>High temperature strain, temperature and damage sensors for advanced aerospace materials</b>	<b>127</b>
	A Wang, K Murphy, R May, G Wang, S Gollapudi and R Claus Virginia Polytechnic, USA	
17.40	<b>Conformal acoustic waveguide technology for smart aerospace structures</b>	<b>131</b>
	J N Schoess and C T Sullivan Honeywell Systems & Research Centre, USA	
18.00	<b>Fiber optic strain sensing for smart adaptive structures</b>	<b>135</b>
	B Mason, D Hogg and R M Measures University of Toronto, Canada	
	<b>Vehicle weighing in motion with fiber optic sensors</b>	<b>139</b>
	S Teral Alcatel Cable Contracting, France	
	<b>Fluorescent plastic fiber sensors for detection of humidity, breathing condition and temperature</b>	<b>143</b>
	S Muto and H Ito Yamanashi University, Japan	

	<b>An optical-fiber fatigue crack detection and monitoring system</b>	<b>147</b>
	K F Hale Brunel University, UK	
	<b>Fiber optic distributed temperature sensing</b>	<b>151</b>
	P R Orrell and A P Leach York Sensors Ltd, UK	
	<b>Preliminary evaluation for developing smart ropes using embedded sensors</b>	<b>155</b>
	R G May, R O Claus and K A Murphy Virginia Polytechnic, USA	
	<b>Thermo-elastic auto-measurement of the Grüneisen parameter by a polarimetric fiber-optic sensor</b>	<b>159</b>
	P Escobar Rojo and M Martinelli CISE Tecnologie Innovative SpA, Italy M G Beghi and G Caglioti Politecnico di Milano, Italy	
<b>SESSION (5)</b>	<b>ACTUATOR APPLICATIONS</b>	
08.30	<b>Mechanics issues of induced strain actuation</b>	<b>163</b>
	C A Rogers Virginia Polytechnic, USA Invited Speaker	
09.00	<b>Piezoelectric ceramics in smart actuators and systems</b>	<b>177</b>
	K Uchino The Pennsylvania State University, USA	
09.20	<b>The stability of strain in shape-memory actuators</b>	<b>181</b>
	C M Friend Cranfield Institute of Technology, UK	
09.40	<b>Active vibration control of flexible linkage mechanisms using shape memory alloy fiber-reinforced composites</b>	<b>185</b>
	A Venkatesh, J Hilborn, J-E Bidaux and R Gotthardt Swiss Federal Institute of Technology, Switzerland	
10.00	<b>Shape memory alloy adjustable camber (SMAAC) control surfaces</b>	<b>189</b>
	C H Beauchamp, R H Nadolink, S C Dickinson and L M Dean Naval Undersea Warfare Center, USA	
10.20	<b>COFFEE</b>	
	<b>Measurement of impulsive pressure applied on a thin plate by piezoelectric transducers</b>	<b>193</b>
	T Adachi, S Ujihashi and H Matsumoto Tokyo Institute of Engineering, Japan	
	<b>Thermal cycling of shape memory alloy wires using semiconductor heat pump modules</b>	<b>197</b>
	M A Thrasher, A R Shahin, P H Meckl and J D James Purdue University, USA	

**SESSION (6) SMART CONCEPTS FOR CIVIL ENGINEERING I**

- 10.50 **Recent developments in active structural control research in the USA** 201  
 G W Housner  
 California Institute of Technology, USA  
 S F Masri  
 University of Southern California, USA  
 Invited Speaker  
 T T Soong  
 State University of New York, USA
- 11.20 **Bearings of a bridge fitted with load measuring devices based on an optical fiber technology** 207  
 J M Caussignac, A Chabert, G Morel  
 LCPC, France  
 P Rogez and J Seantier  
 Societe Freyssinet-Industries, France
- 11.40 **Possibilities for the use of strain gauged reinforcement in smart structures** 211  
 R H Scott and P A T Gill  
 University of Durham, UK
- 12.00 **Fiber-optic interferometric sensors for concrete structures** 215  
 P Escobar, V Gusmeroli and M Martinelli  
 CISE Tecnologie Innovative SpA, Italy  
 I Lanciani and P Morabito  
 ENEL-CRIS, Italy
- 12.20 **Monitoring the performance of real building structures** 219  
 H D Wright and R M Lloyd  
 University of Strathclyde, UK
- 12.40 LUNCH
- Fiber-optic intensity-modulated sensors for continuous observation of concrete and rock-fill dams** 223  
 A Holst  
 Wolfgang Habel Institute of Structural Engineering, Germany  
 R Lessing  
 SICOM GmbH, Germany

**SESSION (7) SMART CONCEPTS FOR CIVIL ENGINEERING II**

- 13.50 **Structural control research at the National Science Foundation** 227  
 J Eleonora Sabadell  
 National Science Foundation, USA  
 Invited Speaker
- 14.20 **Proposal of a hybrid active dynamic vibration absorber for high-rise buildings under earthquake excitation** 233  
 K Yoshida and T Watanabe  
 Keio University, Japan
- 14.40 **An advance notification system for smart structures in seismic zones** 237  
 H A Smith, Y Takeuchi and H C Shah  
 Stanford University, USA

15.00	<b>Optical fiber sensors for the quantitative measurement of strain in concrete structures</b>	<b>241</b>
	B Kruschwitz, R O Claus, K A Murphy, R G May and M F Gunther Virginia Polytechnic, USA	
15.20	<b>Predictive control of seismic response of structure taking into account the soil-structure interaction</b>	<b>245</b>
	T Sato and K Toki Kyoto University, Japan	
15.40	<b>Installation and preliminary results from fiber optic sensors embedded in a concrete building</b>	<b>409</b>
	D R Huston, P L Fuhr, P J Kajenski, T P Ambrose and W B Spillman University of Vermont, USA	
16.00	<b>COFFEE</b>	
	<b>Towards a methodology for designing active elements into civil structures</b>	<b>251</b>
	S A Austin, R M Goodall and J S Nolan Loughborough University, UK	

#### SESSION (8)      IMPLICATIONS FOR RELIABILITY

16.20	<b>Short term fatigue behaviour of composite materials containing embedded fiber optic sensors and actuators</b>	<b>255</b>
	S S J Roberts and R Davidson AEA Technology, UK	
16.40	<b>Stress monitoring and re-adjustment in concrete structures</b>	<b>263</b>
	C Abdunur LCPC, France	
17.00	<b>The influence of fiber optic sensors on the performance of advanced composite components</b>	<b>267</b>
	N Fox, P Sheard, and S Steadman Pera International, UK	
17.20	<b>Evaluation of an optical signal response and failure mechanisms induced by the transverse shear deformation in smart structures</b>	<b>277</b>
	A K Tay Ford Motor Company, USA D A Wilson and J R Houghton Tennessee Technological University, USA R L Wood TEXTRON Aerostructures, USA	
	<b>CAIO (Computer aided internal optimization): A powerful method to optimize fiber arrangement in composite materials</b>	<b>281</b>
	R Kriechbaum, J Schäfer and C Mattheck Karlsruhe Nuclear Research Center, Germany	
	<b>Performance of fiber optic sensors in fracture mechanics applications</b>	<b>285</b>
	A Shukla and R Singh University of Rhode Island, USA N Narendran Mechanical Technology Inc., USA	

**SESSION (9) CONTROL & SIGNAL PROCESSING ISSUES**

08.30	<b>Technological challenges with smart structures in German aircraft industry</b> Chr Boller, H Hönlinger and O Sensburg MBB - Deutsche Aerospace, Germany	289
08.50	<b>Smart health monitoring of aircraft structures using neural networks</b> J N Kudva and N Munir Northrop Corporation, USA	†
09.10	<b>Application of fuzzy control/neural networks to rendezvous simulation of space structure</b> Y Matsuzaki, H Hosoda and S Abe Nagoya University, Japan	293
09.30	<b>Identification and feedback control in structures with piezoceramic actuators</b> H T Banks, K Ito and Y Wang University of Southern California, USA	297
09.50	<b>COFFEE</b>	
	<b>Acceleration feedback method applied to active tuned mass damper</b> I Nishimura, T Kobori, M Sakamoto, N Koshika, K Sasaki and S Ohru Kobori Research Complex, Japan	301
	<b>Control design for smart flexible structures</b> R Katebi Strathclyde University, UK	305
	<b>ARMA models for real-time system identification of smart structures</b> R S Betros, N R Steffen and M J Triller TRW Space & Technology Group, USA	309
	<b>Optimal location of structural control devices: A progressive collapse analogy</b> J Holnicki-Szulc Polish Academy of Sciences, Poland F López-Almansa, J Rodeller and P Cruells Technical University of Catalonia, Spain	313

**SESSION (10) CONTROL SYSTEMS USING SMART TECHNOLOGY**

10.10	<b>D.L.R.'s smart structures research programme</b> E Breitbach D.L.R., Germany Invited Speaker	†
10.40	<b>Optimal placement of piezoelectric actuators in adaptive truss structures</b> R Lammering D.L.R., Germany	317
11.00	<b>The smart structures technology in the vibration control of helicopter blades in forward flight</b> F Nitzsche and E Breitbach D.L.R., Germany	321

† Paper not available at time of going to press

11.20	<b>Influence of electrode size on the active suppression of sound reflection from submerged plates using distributed piezoelectric actuators</b> P E Barbone Stanford University, USA A M B Braga Pontifícia Universidade Católica do Rio de Janeiro, Brazil	325
11.40	<b>Smart structures with piezopolymers for space applications</b> W Charon Dornier GmbH, Germany G Lindner and H Roth Fachhochschule Ravensburg-Weingarten, Germany	329
12.00	<b>Active flutter suppression of a tube conveying fluid</b> J Tani and Y Sudani Tohoku University, Japan	333
12.20	<b>LUNCH</b> <b>Structural design of active precision structures</b> W Charon Dornier GmbH, Germany	337
	<b>The application of signal processing and knowledge based techniques to the health monitoring of gas turbine engines</b> M N Brown, R Stewart and T Durrani University of Strathclyde, UK T Buggy BAeSEMA Ltd, UK B Rickman Dowty Maritime, UK	341
	<b>An innovative class of macroscopically smart composite structural materials featuring both actuators and sensors</b> M V Gandhi, B S Thompson and S R Kasiviswanathan Michigan State University, USA	345
	<b>Smart slewing frames</b> D J Leo and D J Inman State University of New York at Buffalo, USA	349
	<b>Non-resonant systems for adaptive and smart structural control</b> N Shaikh and Y Song University of Nebraska-Lincoln, USA	353

**SESSION (11) FUTURE DEVELOPMENTS IN SMART CONCEPTS**

13.30	<b>Light emitting intelligent Langmuir-Blodgett films</b> S Kurosawa, K Sugai and S Miyata Tokyo University of Agriculture and Technology, Japan Invited Speaker	407
14.00	<b>Smart structures and intelligent materials for biomedical applications</b> G W Hastings University of London, UK Invited Speaker	357

14.30	<b>Simulation of the dynamic behaviour of polymeric gels</b> W R Witkowski, D J Segalman, D B Adolf and B Hance Sandia National Laboratories, USA	363
14.50	<b>Smart materials which sense, activate and repair damage; hollow porous fibers in composites release chemicals from fibers for self-healing, damage prevention, and/or dynamic control</b> C M Dry University of Illinois at Urbana-Champaign, USA	367
15.10	<b>COFFEE</b> <b>Superionic conductors as smart materials: Foundations and areas for applications</b> S Sigaryov Russian Academy of Sciences, Russia	373
	<b>Multiple frequency interference in photorefractive media</b> D E Cox and S S Welch NASA Langley Research Center, USA	379

## SESSION (12) SMART TECHNOLOGY APPLICATIONS

15.30	<b>Actuation strain decoupling through enhanced directional attachment in plates and aerodynamic surfaces</b> R Barrett University of Kansas, USA	383
15.50	<b>Adaptive/conformal wing design for future aircraft</b> F Austin, G J Knowles, W G Jung, C C Tung and E M Sheedy Grumman Corporate Research Center, USA	387
16.10	<b>Design and characterisation of a smart sensor/actuator sub-system for large flexible space structures</b> D Uffen and H Scholaert AASTRA Aerospace Inc., Canada	†
16.30	<b>Mechanical validation of smart structures</b> A J Bronowicki, R S Betros, T W Nye, L J McIntyre, L R Miller and G R Dvorsky TRW Space and Defense, USA	†
16.50	<b>In-situ acoustical and optical waveguide sensors</b> C V O'Keefe, B B Djordjevic and B N Ranganathan Martin Marietta Laboratories, USA	391
	<b>Material processing diagnostic by optical interferometry</b> P Vavassori and M Martinelli CISE Tecnologie Innovative, Italy	395
	<b>Use of electro-rheological fluids for adaptive vibration isolation</b> R J Randall and W F Tsang Royal Naval Engineering College, UK	399

† Paper not available at time of going to press

<b>Transient response of an anisotropic solid</b> Y Wang and R K N D Rajapakse University of Manitoba, Canada	<b>403</b>
<b>Author Index</b>	<b>417</b>
<b>Keyword Index</b>	<b>419</b>
