

PROCEEDINGS OF SPIE

Radar Sensor Technology XXVII

Abigail S. Hedden
Gregory J. Mazzaro
Ann Marie Raynal
Editors

1–3 May 2023
Orlando, Florida, United States

Sponsored and Published by
SPIE

Volume 12535

Proceedings of SPIE 0277-786X, V. 12535

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Radar Sensor Technology XXVII, edited by Abigail S. Hedden, Gregory J. Mazzaro,
Ann Marie Raynal, Proc. of SPIE Vol. 12535, 1253501 · © 2023 SPIE
0277-786X · doi: 10.1117/12.2689012

Proc. of SPIE Vol. 12535 1253501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Radar Sensor Technology XXVII*, edited by Abigail S. Hedden, Gregory J. Mazzaro, Ann Marie Raynal, Proc. of SPIE 12535, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SYSTEMS AND APPLICATIONS I

- 12535 02 **Statistical analysis of radar parameters from published research** [12535-1]
- 12535 03 **A proposed concept for metacognitive configuration switching for tracking radar systems**
[12535-2]
- 12535 04 **Long-range single-target tracking with UWB SoC: further development** [12535-3]

SYSTEMS AND APPLICATIONS II

- 12535 05 **Application of low-cost software-defined radio to augmented radio navigation** [12535-5]
- 12535 06 **Airborne antenna placement optimization for navigational aid infrastructure inspection mission**
[12535-6]
- 12535 08 **Optimized phase shifts in intelligent reflective surfaces for robust radar-based indoor coverage
enhancement** [12535-7]

ALGORITHMS AND PROCESSING

- 12535 09 **Sudoku sequences, Costas sequences, and random permutations in a multi-sub-FDA radar**
[12535-9]
- 12535 0A **Connected spectrogram graph fitting and random optimization combined time frequency
analysis** [12535-10]
- 12535 0B **The extended Luenberger sliding innovation filter** [12535-12]
- 12535 0C **Quantum radar: a brief review of current progress and new methods of understanding and
signal processing, validated by experimental results** [12535-13]
-

PHENOMENOLOGY I

- 12535 0D **RF stealth for small UAS: characterization and evaluation of the impacts of RFI and RCS**
[12535-14]
- 12535 0E **Radar micro-Doppler predictions and analysis for the DJI Phantom 2 drone at X, V, and W-band** [12535-15]

PHENOMENOLOGY II

- 12535 0F **Physical layer mechanisms for coherent change detection** [12535-18]
- 12535 0G **Application of the Boltzmann-Ehrenfest principle to the resonant frequency shift of a radio-wave electromagnetic cavity containing a dielectric object** [12535-19]
- 12535 0H **Loaded waveguide measurements of plastic explosives at V-band** [12535-20]

MILLIMETER- AND SUBMILLIMETER-WAVE SENSING AND IMAGING

- 12535 0I **Short-range measurements of dielectric and conductive targets using a 38-GHz active incoherent millimeter-wave imaging array** [12535-21]
- 12535 0J **Incoherent millimeter-wave imaging using 5G communications signals of opportunity for detection of cracks in building materials** [12535-22]
- 12535 0K **Partial image reconstruction adapted to extracting the frequency spectrum of discrete targets in millimeter-wave AIT images** [12535-24]
- 12535 0M **Imaging experiments with a 340-GHz FMCW radar and frequency-diverse holograms**
[12535-27]
- 12535 0N **Fast and sensitive MMW imaging system with up-conversion readout working in the NIR zone**
[12535-28]

SPECIAL SESSION ON AUTOMOTIVE RADAR

- 12535 0Q **Millimeter wave radar-based road segmentation** [12535-30]

AI/ML AND RADAR SENSOR TECHNOLOGY: JOINT SESSION WITH CONFERENCES 12535 AND 12538

- 12535 0R **Investigation of potential 5G RF interference with C-band radar operations and mitigation solutions** [12535-32]

- 12535 OS **Ghost imaging at submillimeter waves: correlation and machine learning methods** [12535-33]
- 12535 OT **Multimodal feature assessment using multibranch 3D CNN to BI-LSTM for feature level multi-polarization SAR image data fusion and vehicle identification** [12535-34]

POSTER SESSION

- 12535 OU **Extraction of ground clutter return interference from downward-looking UWB radar signal via low-rank and sparse optimization** [12535-36]

DIGITAL POSTER SESSION

- 12535 OV **Fourier-domain image reconstruction in near-field microwave imaging using a dynamic metasurface antenna: a sparse-sampling-based approach** [12535-11]
- 12535 OW **UAV micro-Doppler recognition comparison of HeRM lines versus blade flash phenomenology** [12535-16]
- 12535 OX **UAV discrimination from birds using radar track information** [12535-17]
- 12535 OY **Fast image reconstruction for near-field terahertz imaging with multistatic non-uniform sparse arrays** [12535-25]

Conference Committee

Symposium Chairs

Tien Pham, The MITRE Corporation (United States)
Douglas R. Droege, L3Harris Technologies, Inc. (United States)

Symposium Co-chairs

Augustus W. Fountain III, University of South Carolina (United States)
Teresa L. Pace, L3Harris Technologies, Inc. (United States)

Program Track Chair

Ann Marie Raynal, Sandia National Laboratories (United States)

Conference Chairs

Abigail S. Hedden, U.S. Army Combat Capabilities Development Command (United States)
Gregory J. Mazzaro, The Citadel-The Military College of South Carolina (United States)
Ann Marie Raynal, Sandia National Laboratories (United States)

Conference Program Committee

Jeffrey Barber, U.S. Department of Homeland Security (United States)
Matthew J. Brandsema, Applied Research Laboratory, The Pennsylvania State University (United States)
Joseph C. Deroba, U.S. Army Combat Capabilities Development Command (United States)
Armin W. Doerry, Sandia National Laboratories (United States)
Ryan A. Elwell, DEVCOM C5ISR (United States)
Mark Govoni, DEVCOM Army Research Laboratory (United States)
Sevgi Zubeyde Gurbuz, The University of Alabama (United States)
Majeed M. Hayat, Marquette University (United States)
Seong-Hwoon Kim, Spartan Radar (United States)
Bingcheng C. Li, Lockheed Martin Corporation (United States)
Changzhi Li, Texas Tech University (United States)
Neeraj Magotra, Western New England University (United States)
Anthony F. Martone, DEVCOM Army Research Laboratory (United States)
Claire Migliaccio, Université Côte d'Azur (France)
Thomas Mitchell, ICEYE Oy (United States)
Ram M. Narayanan, The Pennsylvania State University (United States)

Marius Necsoiu, U.S. Army Research Laboratory (United States)
Lam H. Nguyen, DEVCOM Army Research Laboratory (United States)
Markus Peichl, Deutsches Zentrum für Luft- und Raumfahrt e.V.
 (Germany)
Zhengyu Peng, Aptiv (United States)
Brian R. Phelan, DEVCOM Army Research Laboratory (United States)
Thomas J. Pizzillo, U.S. Naval Research Laboratory (United States)
Zhijun G. Qiao, The University of Texas Rio Grande Valley
 (United States)
Kenneth I. Ranney, DEVCOM Army Research Laboratory
 (United States)
Duncan A. Robertson, University of St. Andrews (United Kingdom)
David M. Sheen, Pacific Northwest National Laboratory
 (United States)
David Tahmoush, Northeastern University (United States)
Aleksi A. Tamminen, Aalto University (Finland)
Julio V. Urbina, The Pennsylvania State University (United States)
Russell Vela, U.S. Army Space and Missile Defense Command
 (United States)
Salvador Elias Venegas-Andraca, Tecnológico de Monterrey
 (Mexico)
David A. Wikner, DEVCOM Army Research Laboratory (United States)
Okan Yurduseven, Queen's University Belfast (United Kingdom)
Yan Rockee Zhang, The University of Oklahoma (United States)
Ruolin Zhou, University of Massachusetts Dartmouth (United States)
