

PROCEEDINGS OF SPIE

Nanophotonics and Macrophotonics for Space Environments IV

Edward W. Taylor
David A. Cardimona
Editors

3–4 August 2010
San Diego, California, United States

Sponsored and Published by
SPIE

Volume 7817

Proceedings of SPIE, 0277-786X, v. 7817

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nanophotonics and Macrophotonics for Space Environments IV, edited by Edward W. Taylor, David A. Cardimona,
Proc. of SPIE Vol. 7817, 781701 · © 2010 SPIE · CCC code: 0277-786X/10/\$18 · doi: 10.1117/12.878611

Proc. of SPIE Vol. 7817 781701-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Nanophotonics and Macrophotonics for Space Environments IV*, edited by Edward W. Taylor, David A. Cardimona, Proceedings of SPIE Vol. 7817 (SPIE, Bellingham, WA, 2010) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/10/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

MATERIALS AND COMPONENTS FOR SPACE ENVIRONMENTS I

- 7817 02 **Transistor based quantum well optical modulator and its performance in RF links** [7817-01]
Y. Zhang, T. A. Vang, G. W. Taylor, Univ. of Connecticut (United States)
- 7817 03 **Mechanistic studies for optical switching materials for space environments (Invited Paper)** [7817-02]
G. W. Rayfield, Univ. of Oregon (United States); A. Sarkar, S. Rahman, J. P. Godschalx, Michigan Molecular Institute (United States); E. W. Taylor, International Photonics Consultants, Inc. (United States)
- 7817 04 **Measuring space radiation with ADIS instruments (Invited Paper)** [7817-03]
J. J. Connell, C. Lopate, R. B. McKibben, The Univ. of New Hampshire (United States); J. Merk, Aurora Flight Sciences Corp. (United States)
- 7817 05 **Testing of laser components subjected to exposure in space (Invited Paper)** [7817-04]
N. S. Prasad, NASA Langley Research Ctr. (United States)
- 7817 06 **Organic based semiconductor device structures for detecting ionizing radiation in a space environment (Invited Paper)** [7817-05]
M. Bardash, QEL, Inc. (United States)

NOVEL MATERIALS FOR SPACE ENVIRONMENTS

- 7817 07 **Ultra Low Outgassing silicone performance in a simulated space ionizing radiation environment (Invited Paper)** [7817-06]
M. Velderrain, V. Malave, NuSil Technology LLC (United States); E. W. Taylor, International Photonics Consultants, Inc. (United States)
- 7817 08 **Effect of ionizing radiation on the properties of superhydrophobic silicone surfaces (Invited Paper)** [7817-07]
A. M. Lyons, M. Barahman, B. Mondal, College of Staten Island, CUNY (United States); E. W. Taylor, International Photonics Consultants, Inc. (United States)
- 7817 09 **Irradiation of hydrophobic coating materials by gamma rays and protons: space applications (Invited Paper)** [7817-08]
E. W. Taylor, International Photonics Consultants, Inc. (United States); R. G. Pirich, J. D. Weir, D. Leyble, S. Chu, Northrop Grumman Aerospace Systems (United States); L. R. Taylor, International Photonics Consultants, Inc. (United States)

ADVANCES IN ORGANIC AND POLYMER MATERIALS

- 7817 0B **Recent progress on radiation detection from near-infrared to mid-infrared based on frequency upconversion (Invited Paper)** [7817-10]
Y. Jiang, Y. J. Ding, Lehigh Univ. (United States); I. B. Zotova, ArkLight, Inc. (United States); N. S. Prasad, NASA Langley Research Ctr. (United States)
- 7817 0C **Intersubband absorption based upon modulation doped transistor heterostructures** [7817-11]
J. Yao, W. Zheng, H. Opper, J. Cai, G. W. Taylor, ODIS, Inc. (United States)
- 7817 0D **Multi-layer far-infrared component technology (Invited Paper)** [7817-12]
R. E. Peale, J. W. Cleary, Univ. of Central Florida (United States); W. R. Buchwald, A. Davis, S. Wentzel, B. Stacy, Air Force Research Lab. (United States); O. Edwards, Zyberwear, Inc. (United States)
- 7817 0E **Designing organic molecules for terahertz radiation generation in robust crystals (Invited Paper)** [7817-13]
K. Clays, Katholieke Univ. Leuven (Belgium); R. J. Docherty, J. Fielden, M. Helliwell, J. Raftery, R. Shaw, C. A. Swanson, B. J. Coe, Univ. of Manchester (United Kingdom)

MATERIALS AND COMPONENTS FOR SPACE ENVIRONMENTS II

- 7817 0F **Large-area InGaAs quad photoreceiver for Laser Interferometry Space Antenna (Invited Paper)** [7817-14]
S. Datta, A. Joshi, J. Rue, Discovery Semiconductors, Inc. (United States)
- 7817 0G **Advances in high power fiber laser and amplifier components for space environments (Invited Paper)** [7817-15]
A. D. Sanchez, Air Force Research Lab. (United States)

OPTICAL FIBERS AND LASERS FOR SPACE I

- 7817 0I **Radiation effects on rare-earth doped optical fibers (Invited Paper)** [7817-17]
S. Girard, CEA, DAM, DIF (France); Y. Ouerdane, Lab. Hubert Curien, CNRS (France); M. Vivona, Lab. Hubert Curien, CNRS (France) and ixFiber SAS (France); B. Torteche, Lab. Hubert Curien, CNRS (France); T. Robin, ixFiber SAS (France); A. Boukenter, Lab. Hubert Curien, CNRS (France); C. Marcandella, CEA, DAM, DIF (France); B. Cadier, ixFiber SAS (France); J.-P. Meunier, Lab. Hubert Curien, CNRS (France)
- 7817 0J **Development of radiation hard semiconductor sensors for charged particle tracking at very high luminosities (Invited Paper)** [7817-18]
C. Betancourt, V. Fadeyev, H. F.-W. Sadrozinski, J. Wright, Univ. of California, Santa Cruz (United States)
- 7817 0K **Pulse shaping fiber lasers for free-space and lidar applications (Invited Paper)** [7817-19]
P. Wan, J. Liu, L.-M. Yang, PolarOnyx, Inc. (United States); F. Amzajerdian, NASA Langley Research Ctr. (United States)

- 7817 OL **Advanced end-to-end fiber optic sensing systems for demanding environments (Invited Paper)** [7817-20]
R. J. Black, B. M. Moslehi, IFOS (United States)

OPTICAL FIBERS AND LASERS FOR SPACE II

- 7817 ON **Transceiver technology with in-situ diagnostic optical power monitoring for defense applications** [7817-22]
S. Mahnkopf, D. Louderback, M. Harris, T. Eustis, V. Koleva, P. Guilfoyle, OptiComp Corp. (United States)
- 7817 OP **GaAs based monolithic optoelectronic device integration technology** [7817-24]
J. Cai, H. Opper, R. Basilica, B. Garber, ODIS, Inc. (United States); G. W. Taylor, Univ. of Connecticut (United States)
- 7817 OQ **Compact and robust open-loop fiber-optic gyroscope for applications in harsh environments** [7817-25]
B. M. Moslehi, IFOS (United States); R. Yahalom, InFiber Technology (United States);
F. Faridian, R. J. Black, IFOS (United States); E. W. Taylor, International Photonics Consultants, Inc. (United States); T. Ooi, A. Corder, Missile Defense Agency, U.S. Dept. of Defense (United States)

Author Index

Conference Committee

Program Track Chairs

Stephen M. Hammel, Space and Naval Warfare Systems Center,
San Diego (United States)

Alexander M. J. van Eijk, TNO Defense, Security and Safety
(Netherlands)

Conference Chairs

Edward W. Taylor, International Photonics Consultants, Inc. (United
States)

David A. Cardimona, Air Force Research Laboratory (United States)

Program Committee

Mansoor Alam, Nufern (United States)

Koen J. Clays, Katholieke Universiteit Leuven (Belgium)

Douglas M. Craig, Air Force Research Laboratory (United States)

Raluca Dinu, GigOptix Corporation (United States)

Alexandre I. Fedoseyev, CFD Research Corporation (United States)

Michael J. Hayduk, Air Force Research Laboratory (United States)

Danhong Huang, Air Force Research Laboratory (United States)

Mark G. Kuzyk, Washington State University (United States)

Ronald G. Pirich, Northrop Grumman Aerospace Systems (United
States)

Narasimha S. Prasad, NASA Langley Research Center (United States)

Anthony D. Sanchez, Air Force Research Laboratory (United States)

Linda R. Taylor, International Photonics Consultants, Inc. (United States)

Session Chairs

- 1 Materials and Components for Space Environments I
Narasimha S. Prasad, NASA Langley Research Center (United States)
Abhijit Sarkar, Michigan Molecular Institute (United States)
- 2 Novel Materials for Space Environments
Ronald G. Pirich, Northrop Grumman Aerospace Systems (United
States)
- 4 Advances in Organic and Polymer Materials
Koen J. Clays, Katholieke Universiteit Leuven (Belgium)

- 5 Materials and Components for Space Environments II
Anthony D. Sanchez, Air Force Research Laboratory (United States)
- 6 Optical Fibers and Lasers for Space I
David A. Cardimona, Air Force Research Laboratory (United States)
- 7 Optical Fibers and Lasers for Space II
Douglas M. Craig, Air Force Research Laboratory (United States)
